*MCMC Plan 2026–2030 (**MCMC P2630**)*
Malaysian Communications and Multimedia Commission (MCMC)

Cover Page Rationale "Collective Momentum"

The MCMC Plan 2026–2030 (***MCMC P2630***) cover design embodies the central idea of collective momentum, where diverse perspectives, strategic priorities and future aspirations converge into one coherent direction for MCMC from 2026 to 2030. The visual composition reflects the journey from multiple inputs towards a unified institutional direction, symbolising how the Plan brings together diverse stakeholders and priorities into a shared vision.

The flowing strands represent the diversity of perspectives, insights and strategic priorities contributing to ***MCMC P2630***, while their convergence into a continuous loop symbolises alignment, integration and a common institutional direction. The visual flow further represents the translation of strategic direction into coordinated actions, milestones and delivery, highlighting ***MCMC P2630*** as not only a strategy, but a connected system that aligns ambition with disciplined implementation.

Overall, the cover establishes ***MCMC P2630*** as a unifying framework for collective progress, bringing together MCMC's diverse sectors, priorities and relevant stakeholders towards a shared direction and coordinated delivery.

Official Logo

MCMC P2630

Logo and Rationale

The MCMC Plan 2026-2030 (***MCMC P2630***) identity represents the Commission's five-year journey towards a more connected, trusted, inclusive and future-ready digital ecosystem. The name links the implementation period, 2026 to 2030, with the Plan's strategic architecture of 30 Strategies: 26 thrust-level Strategies organised under six (6) Strategic Thrusts, supported by four (4) Cross-Cutting Enabling Initiatives.

Inspired by the continuous form of a Mobius strip, the logo conveys continuity, integration and transformation. Its interwoven lines reflect the convergence of telecommunications, broadcasting, postal and courier services, digital platforms and emerging technologies within an increasingly interconnected ecosystem.

The flowing form also represents collective momentum. It brings together MCMC's regulatory, developmental and enabling roles, supported by collaboration across Government, industry, academia and society, towards a shared strategic direction for 2030.

Glossary 31

Executive Summary

This Action Plan is MCMC's multi-year implementation roadmap for 2026–2030. It translates ***MCMC P2630*** into 30 Strategies: 26 thrust-level Strategies across six (6) Strategic Thrusts and four (4) cross-cutting Enabling Initiatives.

The portfolio provides a coherent basis for advancing MCMC's regulatory, sectoral and institutional priorities within its statutory remit and under the policy leadership of the Ministry of Communications. Across the six (6) Strategic Thrusts, it seeks to strengthen regulatory frameworks, enable future-ready infrastructure, support sustainable, resilient and innovation-driven ecosystems, reinforce digital trust and consumer empowerment, and develop a progressive talent and workforce. The four Enabling Initiatives provide cross-cutting support for coordinated implementation across MCMC.

The Action Plan sets out the Strategic Intent and Strategic Outcome for each Strategy, together with the associated Initiative Code, Strategic Initiative(s), User Division(s) and Implementation Horizon, where applicable. Implementation will be operationalised through MCMC's Annual Work Plan (AWP), which translates the multi-year portfolio into annual programmes and initiatives, KPIs, baselines, numerical targets, milestones, resource requirements and accountable delivery commitments.

MCMC P2630 will operate as a living-strategy framework. Progress, performance and changes in the operating environment will inform periodic review and proportionate recalibration through established governance and change-control arrangements, while maintaining alignment with national priorities, MCMC's mandate and the intended outcomes for 2030.

Looking ahead, *MCMC P2630* will continue to serve as a living strategy that guides MCMC in navigating emerging opportunities and challenges within an increasingly dynamic digital landscape.

How to Read Each Strategy

1. Strategic Intent
2. Strategic Outcome
3. Initiatives Code
4. Strategic Initiative(s)
5. User Division(s)
6. Implementation Horizon

A Living Strategy

- Strategic Direction
- Multi-Year Action Plan
- Annual Implementation and Monitoring
- Review and Adaptation

Annual KPIs, baselines, numerical targets, deliverables, budgets and milestones are established through the AWP.

MCMC P2630

01 1 Vision

02 2 Missions

03 6 Strategic Thrusts

04 26 Thrust-Level Strategies with 4 Cross-Cutting Enabling Initiatives

05 Strategic Initiatives

06 Annual Work Plans (AWP)

07 KPIs and Outcomes
Measurable Impact by 2030

MCMC P2630 Portfolio and Implementation Architecture at a Glance

The Action Plan translates the strategic direction of Advancing Inclusivity into a multi-year implementation roadmap for 2026–2030.

SECTION 1

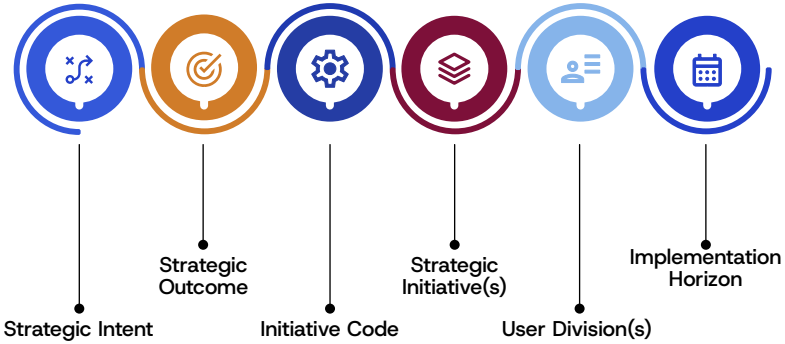

P2630 Strategy Portfolio

Strategies and Enabling Initiatives

30 Strategies to 2030

26 Thrust-Level Strategies across six (6) Strategic

4 Cross-Cutting Enabling Initiatives (E.1–E.4)

Portfolio to delivery

SECTION 2

Governance, Implementation and Annual Operationalisation

Strategic Implementation of *MCMC P2630*

- Governance and decision rights
- Performance monitoring and reporting
- Escalation pathways
- Change control
- Periodic review and adaptation
- Institutional accountability

MCMC's Annual Work Plan

Operationalises the five-year portfolio annually through:

Annual deliverables → KPIs and targets → Budgets and resources → Milestones and status

Living-strategy feedback Performance evidence and changes in the operating environment inform periodic review and proportionate recalibration.

MCMC P2630 Portfolio at a Glance

MCMC P2630 comprises **30 Strategies: 26 thrust-level Strategies and four (4) Cross-Cutting Enabling Initiatives.**

ST1 Robust Regulatory Frameworks

S1.1	Establish a future-proof regulatory regime
S1.2	Develop a National Spectrum Outlook for Next-Generation Infrastructure
S1.3	Transform Universal Service Provision and Universal Service Obligation for a competitive future

3 Strategies

ST2 Future-Ready Infrastructure

S2.1	Accelerate resilient and meaningful fit-for-purpose connectivity
S2.2	Strengthen national disaster and emergency response through advanced mechanisms
S2.3	Strengthen national readiness for 5G and next-generation infrastructure deployment
S2.4	Strengthen Malaysia's integrated international gateways and connectivity
S2.5	Modernise national postal infrastructure for a parcel-driven and automated logistics future

5 Strategies

ST3 Sustainable and Resilient Ecosystems

S3.1	Reinvent service delivery through shared infrastructure to ensure optimum choices
S3.2	Expand NADI MADANI as Malaysia's community digital empowerment ecosystem
S3.3	Advance sustainability and ESG through sectoral guidelines, standards, capacity building and climate technology adoption
S3.4	Establish engagements with sectoral players and ecosystem partners to facilitate consultations on industry trends and business diversification
S3.5	Embed circular economy and low-carbon principles across sectoral value chain
S3.6	Amplify social impact through collective digital inclusion initiatives

6 Strategies

ST4 Innovation-Driven Ecosystems

S4.1	Catalyse R&D ecosystem through strategic partnerships
S4.2	Integrate emerging technologies into nationwide services
S4.3	Advance cross-sector interoperability via innovation platforms and sandboxes
S4.4	Develop Emerging Technology Use Case Catalogue Roadmap
S4.5	Advance smart city innovation through emerging technologies

5 Strategies

ST5 Digital Trust and Consumer Empowerment

S5.1	Establish a national digital trust, safety and network security framework and implementation
S5.2	Elevate national digital trust through comprehensive advocacy and safety programmes
S5.3	Develop a people-centred digital services platform for advisory and redress
S5.4	Establish a national Sovereign AI Cloud for high-trust data and critical services
S5.5	Standardise viewership and digital measurement across media and platforms

5 Strategies

ST6 Progressive Talent and Workforce

S6.1	Develop workforce intelligence and strategic talent frameworks
S6.2	Empower communities through inclusive innovation and entrepreneurship

2 Strategies

4 Cross-Cutting Enabling Initiatives and Supporting All Six Strategic Thrusts

- **E.1** Performance Monitoring Governance
- **E.2** Digital Implementation Dashboard
- **E.3** ASEAN and Global Strategic Partnerships
- **E.4** Strategic Stakeholder Communications

Annual programmes, deliverables, KPIs, baselines, targets, milestones and resources are established through MCMC's Annual Work Plan.

Section 1

MCMC P2630 Strategies and Enabling Initiatives

Translating 30 Strategies into coordinated implementation and measurable outcomes through 2030.

Section 1

MCMC P2630 Strategies and Enabling Initiatives

As ***MCMC P2630*** moves from strategic direction to execution, the Plan's strategic architecture of 30 Strategies comprising 26 Thrust-Level Strategies and four (4) Cross-Cutting Enabling Initiatives serves as the core delivery architecture that translates the Plan's vision, missions and Strategic Thrusts into coordinated, measurable and accountable areas of action. Building on the strategic narrative established, this section sets out how MCMC under the policy leadership of the Ministry of Communications, will operationalise its transformation agenda across robust regulatory frameworks, future-ready infrastructure, sustainable and resilient ecosystems, innovation-driven growth, digital trust and consumer empowerment, and progressive talent and workforce development.

The Action Plan sets out six (6) fields for each Strategy includes Strategic Intent, Strategic Outcome, Initiative Code, Strategic Initiative(s), User Division(s) and Implementation Horizon, where applicable. The tables define the five-year strategy portfolio annual deliverables, KPIs, numerical targets, budgets and milestones are approved through MCMC's Annual Work Plan (AWP). The Strategy Planning Division coordinates strategic stewardship and performance monitoring through its respective departmental responsibilities, enabling MCMC to assess how implementation contributes to the Plan's intended outcomes for the Rakyat, Industry and Government.

Strategic Thrust 1 (ST1)
Robust Regulatory Frameworks

Strategic Thrust 1 (ST1) under ***MCMC P2630*** focuses on strengthening MCMC's regulatory frameworks to remain agile, future-ready, and responsive to the evolving digital landscape. As technological convergence accelerates and new business models emerge, regulation must evolve beyond traditional approaches to ensure relevance, effectiveness, and inclusivity across sectors.

Strategy 1.1

Establish a future-proof regulatory regime

Strategic Intent
Cross-sector regulatory architecture covering licensing, market regime, convergence/OTT, regulatory reforms/processes, and enforcement.

Strategic Outcome
By 2030, MCMC's regulatory framework is more coherent, adaptive and responsive to technological and market developments, while providing greater regulatory clarity and supporting responsible innovation.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST1S1.1SI1	Dasar Infrastruktur Digital Negara (DIDN)	Infrastructure Planning Division	2026–2030
ST1S1.1SI2	Postal Services Act 2012 (PSA 2012) Review	Postal Services Planning Division	2026–2030
ST1S1.1SI3	Dasar Penyiaran Negara (DPN)	Emerging Technologies Development Division	2026–2040[1]
ST1S1.1SI4	Full adoption of Internet Protocol v6 (IPv6) for public-facing services	Licensing and Monitoring Division	2026–2030
ST1S1.1SI5	Online Safety Act 2025 (ONSA 2025)	Regulatory Policy Division	2026–2030
ST1S1.1SI6	Regulatory Sandbox	Content Platform Management Division	2026
ST1S1.1SI7	New Communications Equipment Framework (NCEF)	Technology and Standards Division	2026–2027
ST1S1.1SI8	New Framework for Cabling Provider Proficiency (NFCP)	Technology and Standards Division	2027–2029
ST1S1.1SI9	MS QoS for Wireless Broadband Access Service, Wired Broadband Access Service and Public Cellular Service Review	Quality Management Division	2026–2030

"Navigating a rapidly evolving digital landscape requires adaptive, forward-looking regulation that enables innovation while safeguarding trust, fairness, and inclusivity across the ecosystem."

*1.The 2040 horizon represents the wider programme horizon beyond **MCMC P2630** (2026–2030).*

Strategy 1.2

Develop a National Spectrum Outlook for Next-Generation Infrastructure

Strategic Intent

Long-term spectrum planning and refarming aligned to next-generation technologies and global developments.

Strategic Outcome

By 2030, spectrum planning provides greater predictability, efficiency and readiness for emerging technologies and future demand aligned with national policy direction and international developments.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST1S1.2SI1	National spectrum outlook	Spectrum Planning and Assignment Division	2026-2028

Strategy 1.3

Transform Universal Service Provision and Universal Service Obligation for a competitive future

Strategic Intent

Nationwide uplift of connectivity coverage, quality, resilience, and affordability.

Strategic Outcome

By 2030, the Universal Service Provision (USP)/Universal Service Obligation (USO) framework is progressively modernised to deliver more targeted, sustainable and outcome-based universal service interventions for underserved communities.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST1S1.3SI1	Postal Services Fund (PSF)	Postal Services Planning Division	2026-2030
ST1S1.3SI2	Review and amendment of the CMA 1998 and USP Regulations 2002	Universal Service Provision Division, Regulatory Policy Division, Legal Division	2026-2030

Strategic Thrust 2 (ST2)

Future-Ready Infrastructure

Strategic Thrust 2 (ST2) under ***MCMC P2630*** focuses on advancing a future-ready infrastructure landscape that enables universal and meaningful connectivity nationwide. As digital technologies become increasingly embedded in everyday life, the availability, reliability, and inclusivity of infrastructure play a critical role in supporting economic growth, social development and national resilience.

Strategy 2.1

Accelerate resilient and meaningful fit-for-purpose connectivity

Strategic Intent

Coverage, quality and resilience, including broadband and mobile access for all population segments nationwide.

Strategic Outcome

By 2030, Malaysians benefit from wider, reliable, resilient and affordable fit-for-purpose connectivity with improved service quality and reduced gaps in underserved areas.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST2S2.1SI1	Jalinan Digital Negara 2.0 (JENDELA 2.0)	Universal Service Provision Division, Central Monitoring Division	2026-2030
ST2S2.1SI2	Pemacu Ekosistem dan Ketersambungan Kesihatan Digital Negara (PERSADA)	Foresight Division	2026-2028
ST2S2.1SI3	Di Mana Ada Jalan Di Situ Ada Internet	Infrastructure Planning Division	2026-2030

Strategy 2.2

Strengthen national disaster and emergency response through advanced mechanisms

Strategic Intent

Strengthen communications infrastructure to support resilient and interoperable national emergency communications and alerting systems to enhance preparedness, interoperability and resilience.

Strategic Outcome

By 2030, critical communications infrastructure demonstrates improved resilience and restoration capability, supporting timely emergency alerts and continuity of communications during disasters.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST2S2.2SI1	Early Warning System (EWS)	Quality Management Division, Regional and State Coordination Division	2026-2030

Strategy 2.3

Strengthen national readiness for 5G and next-generation infrastructure deployment

Strategic Intent

Readiness and enablement measures for advanced mobile and network technologies, and future evolution beyond 5G.

Strategic Outcome

By 2030, the communications sector demonstrates sustained readiness for 5G evolution and next-generation infrastructure, enabling greater adoption of advanced digital services and use cases.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST2S2.3SI1	Expansion and Strengthening of National 5G Coverage	5G Delivery Office	2026–2030

Strategy 2.4

Strengthen Malaysia's integrated international gateways and connectivity

Strategic Intent

Facilitate the enhancement of international connectivity, network redundancy and gateway resilience including submarine cable systems and cross-border infrastructure.

Strategic Outcome

By 2030, Malaysia has stronger international and domestic gateway capacity, route diversity and infrastructure resilience, reducing vulnerability to connectivity disruptions and supporting future digital demand.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST2S2.4SI1	Sambungan Kabel Dasar Laut MADANI (SALAM)	Universal Service Provision Division	2026–2029

Strategy 2.5

Modernise national postal infrastructure for a parcel-driven and automated logistics future

Strategic Intent

Physical and digital infrastructure modernisation for postal and logistics networks.

Strategic Outcome

By 2030, postal and parcel services are more reliable, digitally enabled, automated and customer-focused, supporting the sustainability of the postal sector and e-commerce ecosystem.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST2S2.5SI1	Pelan Accelerator Kurier Negara 2.0 (PAKEJ 2.0) Framework	Central Monitoring Division	2026–2030

2.PAKEJ 2.0 is currently presented as an umbrella programme across Strategies 2.5 and 3.1. The programme and its constituent sub-initiatives are being finalised by the Central Monitoring Division. Once confirmed, the relevant sub-initiatives will be assigned and coded under their respective Strategies.

Strategic Thrust 3 (ST3)

Sustainable and Resilient Ecosystems

Strategic Thrust 3 (ST3) under ***MCMC P2630*** focuses on fostering a sustainable and resilient digital ecosystem that balances technological advancement with environmental stewardship, social inclusion, and industry stability. As Malaysia's digital ecosystem continues to expand, this Strategic Thrust supports the development of digital infrastructure, services, and adoption in a responsible and sustainable manner, ensuring that digital growth is balanced with environmental considerations and societal well-being.

"As digital transformation accelerates, sustainability, resilience, and inclusivity must be embedded at the core of ecosystem development to ensure long-term growth that is environmentally responsible, socially equitable, and economically robust."

Strategy 3.1

Reinvent service delivery through shared infrastructure to ensure optimum choices

Strategic Intent

Shared infrastructure and service delivery models to improve efficiency, sustainability, consumer choice and cost optimisation across the sector.

Strategic Outcome

By 2030, fit-for-purpose infrastructure sharing arrangements contribute to more efficient investment, reduced unnecessary duplication and improved service choice, subject to competition and service quality considerations.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST3S3.1SI1	Pelan Accelerator Kurier Negara 2.0 (PAKEJ 2.0) Framework	Central Monitoring Division	2026-2030

Strategy 3.2

Expand NADI MADANI as Malaysia's community digital empowerment ecosystem

Strategic Intent

Support community digital inclusion through NADI MADANI platform by enhancing access, digital skills and essential digital services.

Strategic Outcome

By 2030, NADI MADANI provides an accessible and effective community platform through which underserved communities gain relevant digital skills, access essential services and improve their socioeconomic participation.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST3S3.2SI1	NADI MADANI digital ecosystem	NADI Division	2026-2030

3.PAKEJ 2.0 is currently presented as an umbrella programme across Strategies 2.5 and 3.1. The programme and its constituent sub-initiatives are being finalised by the Central Monitoring Division. Once confirmed, the relevant sub-initiatives will be assigned and coded under their respective Strategies.

Strategy 3.3 Advance sustainability and ESG through sectoral guidelines, standards, capacity building and climate technology adoption

Strategic Intent

Development of ESG frameworks, standards, indicators and capacity building to drive sustainable and climate-conscious practices across sectors within MCMC's purview.

Strategic Outcome

By 2030, regulated sectors demonstrate progressively stronger adoption of applicable sustainability and ESG practices, supported by appropriate guidelines, standards, reporting and capacity development.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST3S3.3SI1	Sustainability and ESG	Sustainability Division	2026-2030

Strategy 3.4 Establish engagements with sectoral players and ecosystem partners to facilitate consultations on industry trends and business diversification

Strategic Intent

Structured, consultative working groups to communicate sectoral growth, diversification and policy insights.

Strategic Outcome

By 2030, structured engagement mechanisms generate actionable policy and industry insights, strengthen collaboration and support responsible business diversification across the communications and multimedia ecosystem.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST3S3.4SI1	Industry Catalyst Initiative	Stakeholder Future Enablement Division	2026-2030

Strategy 3.6 Amplify social impact through collective digital inclusion initiatives

Strategic Intent

Targeted inclusion initiatives beyond NADI MADANI.

Strategic Outcome

By 2030, MCMC and its partners can identify, coordinate and evaluate digital inclusion interventions more effectively producing demonstrable improvements for underserved communities.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST3S3.6SI1	Social Impact and Inclusion Alliance	Sustainability Division	2028-2030

Strategy 3.5 Embed circular economy and low-carbon principles across sectoral value chain

Strategic Intent

Promote circular economy practices, low-carbon operations and responsible lifecycle management of ICT assets.

Strategic Outcome

By 2030, the communications and multimedia sector demonstrates measurable progress towards lower-carbon, resource efficient and circular operating practices.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST3S3.5SI1	Net Zero and Circularity Alliance	Sustainability Division	2028-2030

Strategic Thrust 4 (ST4) Innovation-Driven Ecosystems

Strategic Thrust 4 (ST4) under ***MCMC P2630*** focuses on fostering innovation driven ecosystems that contributes to the growth of Malaysia's digital ecosystem and the advancement of a technology-enabled nation. As technological advancements continue to reshape industries and societal interactions, it is essential to cultivate an environment where innovation thrives, enabling the development and adoption of transformative digital solutions that drive economic growth, productivity, and global competitiveness.

"Innovation serves as the catalyst for sustainable economic growth, enabling nations to harness emerging technologies, unlock new opportunities, and strengthen competitiveness in an increasingly digital and interconnected world."

Strategy 4.1

Catalyse R&D ecosystem through strategic partnerships

Strategic Intent
R&D talent pipeline, applied research, and industry–academia–regulator partnerships.

Strategic Outcome
By 2030, strategic research partnerships generate high quality knowledge, talent and applied innovation that contribute to communications and multimedia policy, sector development and technological capability.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST4S4.1SI1	AIX (AI Transformation Centre)	Human Capital Division	2026-2030
ST4S4.1SI2	Centre of Excellence in Ethics for Emerging Technologies (C3ET)	MCMC Academy Division	2026-2030

Strategy 4.2

Integrate emerging technologies into nationwide services

Strategic Intent
Enable adoption and integration of emerging technologies into public and private sector services at national scale.

Strategic Outcome
By 2030, emerging technologies within MCMC's remit are progressively and responsibly integrated into relevant services, improving accessibility, efficiency and user experience.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST4S4.2SI1	National Address System (NAS)	Digital Innovation and Geospatial Division	2026-2030

Strategy 4.3

Advance cross-sector interoperability via innovation platforms and sandboxes

Strategic Intent

Use of sandboxes and platforms to test, enable and scale interoperability across sectors and technologies.

Strategic Outcome

By 2030, innovation platforms and regulatory sandboxes enable safe experimentation, improved interoperability and the responsible scaling of viable cross-sector solutions.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST4S4.3SI1	NXT Programme	Stakeholder Future Enablement Division	2026-2030

Strategy 4.4

Develop Emerging Technology Use Case Catalogue Roadmap

Strategic Intent

Identify and prioritise high impact emerging technology use cases within MCMC's purview and develop a catalogue and roadmap to guide responsible piloting, adoption and investment.

Strategic Outcome

By 2030, MCMC and the communications and multimedia sector use a prioritised emerging technology use case catalogue and roadmap to guide the responsible piloting and adoption of high impact applications.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST4S4.4SI1	Emerging Technology Use Case Catalogue and Roadmap	Emerging Technologies Development Division	2026-2030

Strategy 4.5

Advance smart city innovation through emerging technologies

Strategic Intent

Frameworks and enablement for scalable, interoperable smart city solutions across Malaysia.

Strategic Outcome

By 2030, MCMC supports the Government, states and local authorities in enabling interoperable and connected smart city solutions through communications infrastructure, standards, geospatial capability and relevant regulatory facilitation.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST4S4.5SI1	Smart City	Emerging Technologies Development Division, Stakeholder Future Enablement Division	2026-2033

*4.The 2033 horizon represents the wider programme horizon beyond **MCMC P2630** (2026-2030).*

Strategic Thrust 5 (ST5)

Digital Trust and Consumer Empowerment

Strategic Thrust 5 (ST5) under ***MCMC P2630*** focuses on fostering a trusted and secure digital ecosystem that enables individuals, businesses, and institutions to participate confidently in the digital economy. In line with national development priorities and the strategic direction of the Ministry of Communications, this Strategic Thrust recognises that, as digital technologies become increasingly embedded in everyday life, maintaining trust, safety, and security is essential to ensuring that digital transformation delivers sustainable and inclusive benefits for all segments of society.

"Trust is the foundation of a thriving digital society, enabling individuals, businesses and governments to engage, innovate and transact with confidence in an increasingly connected world."

Strategy 5.1

Establish a national digital trust, safety and network security framework and implementation

Strategic Intent

Support the implementation of policy and standards frameworks covering digital trust, online safety and network security across the digital ecosystem.

Strategic Outcome

By 2030, the communications and multimedia sector demonstrates stronger security maturity, network resilience and adoption of applicable digital trust and online safety requirements, aligned with the national cybersecurity framework.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST5S5.1SI1	Information and Network Security (INS) Maturity Index	Network Security Governance and Innovation Division	2026–2028

Strategy 5.2

Elevate national digital trust through comprehensive advocacy and safety programmes

Strategic Intent

Public-facing advocacy, education and safety programmes to build digital trust and responsible online behaviour.

Strategic Outcome

By 2030, targeted advocacy and safety programmes contribute to measurable improvements in online safety knowledge, responsible digital behaviour and protective practices among priority communities.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST5S5.2SI1	Kempen Internet Selamat 2.0	Regional and State Coordination Division	2026–2030

Strategy 5.3

Develop a people-centred digital services platform for advisory and redress

Strategic Intent

Design and rollout of an integrated platform for consumer advisory, complaints and redress.

Strategic Outcome

By 2030, consumers have accessible, integrated and responsive advisory and redress services that improve resolution efficiency, transparency and public confidence.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST5S5.3SI1	MCMC NEXUS	Central Monitoring Division	2026-2030

Strategy 5.4

Establish a national Sovereign AI Cloud for high-trust data and critical services

Strategic Intent

Facilitate the development of secure sovereign AI cloud infrastructure that underpins trusted data and critical national digital services.

Strategic Outcome

Subject to formal government mandate and role confirmation, by 2030 MCMC supports the establishment and effective utilisation of secure, resilient and sovereign AI cloud capabilities for approved high trust sectoral or national use cases.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST5S5.4SI1	National Sovereign AI Cloud	National Sovereign AI Cloud Office	2026-2030

Strategy 5.5

Standardise viewership and digital measurement across media and platforms

Strategic Intent

Development of consistent measurement standards for viewership and digital consumption across platforms.

Strategic Outcome

By 2030, the media ecosystem has more consistent, transparent and trusted cross platform audience measurement methodologies that improve industry and regulatory decision making.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST5S5.5SI1	Standardised viewership	Emerging Technologies Development Division	2026-2028

Strategic Thrust 6 (ST6) Progressive Talent and Workforce

Strategic Thrust 6 (ST6) under ***MCMC P2630*** focuses on developing a skilled, adaptable, and inclusive workforce that supports the evolving needs of Malaysia's digital growth. As digitalisation, automation, and emerging technologies continue to reshape industries, strengthening workforce capabilities and future skills readiness is essential to ensuring sustainable growth, innovation, and competitiveness.

"Talent is the foundation of a competitive digital nation, enabling individuals, industries and communities to thrive in an increasingly technology-driven world."

Strategy 6.1 Develop workforce intelligence and strategic talent frameworks

Strategic Intent

Workforce intelligence, talent gap analysis and strategic planning frameworks for the relevant sectors within MCMC's purview.

Strategic Outcome

By 2030, MCMC and the relevant communications and multimedia talent ecosystem have stronger workforce intelligence, succession readiness and capability in identified critical skills.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST6S6.1SI1	Enterprise Capability Architecture (ECA)	Human Capital Division, MCMC Academy Division	2026-2030
ST6S6.1SI2	(C&M) Future Skills Framework (FSF)	MCMC Academy Division	2026-2030

Strategy 6.2 Empower communities through inclusive innovation and entrepreneurship

Strategic Intent

Programmes supporting inclusive innovation, entrepreneurship and community-based economic participation.

Strategic Outcome

By 2030, targeted communities achieve more sustainable economic participation through relevant digital skills, innovation and entrepreneurship support.

Initiative Code	Strategic Initiative(s)	User Division(s)	Implementation Horizon
ST6S6.2SI1	NADI MADANI Smart Services Programmes	NADI Division	2026-2030

Cross-Cutting Enabling Initiatives (E.1 – E.4)

The Cross-Cutting Enabling Initiatives under ***MCMC P2630*** focus on establishing the foundational mechanisms required to support the successful implementation, coordination and delivery of the plan. Recognising that the achievement of strategic outcomes requires robust institutional support, these initiatives aim to strengthen governance, performance management, stakeholder engagement and strategic collaboration across the organisation.

"Strong institutions, effective governance, and organisational excellence are fundamental enablers of successful digital transformation, ensuring that strategic ambitions are translated into measurable outcomes and sustainable impact."

E.1 Establish and implement Performance Monitoring Governance for *MCMC P2630*

Strategic Intent

- This initiative aims to create a centralised governance structure that will guide and monitor the implementation of ***MCMC P2630*** initiatives across MCMC and the ***MCMC P2630*** portfolio.
- It involves establishing a performance and monitoring governance to administer projects, track progress, ensure adherence to approved milestones, timelines and governance requirements.

Strategic Outcome

Throughout 2026–2030, MCMC maintains an effective portfolio performance and monitoring governance mechanism that strenghtens accountability, delivery discipline, risk management and timely executive decision-making.

User Division(s)	Strategy Planning Division
Implementation Horizon	**2026 onwards**

E.2 Develop a digital dashboard for implementation monitoring

Strategic Intent

- This initiative involves the development of an integrated digital dashboard designed to track the implementation of various initiatives under ***MCMC P2630***.
- The dashboard will aggregate data from relevant user divisions providing insights into project status and performance indicators.

Strategic Outcome

From the initial implementation phase, Management has reliable, timely and decision-useful portfolio information to support proactive intervention, resource allocation and transparent monitoring of ***MCMC P2630***.

User Division(s)	Strategy Planning Division
Implementation Horizon	**2026–2030**

E.3 Establish strong partnerships in the ASEAN and global arena

Strategic Intent

Advance MCMC's regional and international partnerships in support of Malaysia's priorities and the strategic direction of the Ministry of Communications.

Strategic Outcome

By 2030, MCMC's regional and international engagements, undertaken in alignment with the Ministry's direction, produce tangible policy, capability, standards and sector-development benefits for Malaysia.

Strategic Initiative(s)	User Division(s)
Malaysia for ITU Council	International Affairs Division
Implementation Horizon 2026-2030	

E.4 Strengthen Strategic Communications and Stakeholder Engagement for *MCMC P2630*

Strategic Intent

This initiative aims to create a robust communications strategy that connects all stakeholders involved in ***MCMC P2630***. By establishing clear channels and protocols, the initiative ensures effective information flow, alignment on objectives, and active engagement to drive successful implementation of ***MCMC P2630*** goals.

Strategic Outcome

Throughout 2026–2030, structured communications strengthen stakeholder understanding, alignment and participation in ***MCMC P2630*** implementation, while providing effective mechanisms for feedback and issue resolution.

Strategic Initiative(s)	User Division(s)
MCMC Strategic Communication Framework and Playbook	Communications and Industry Relations Division
Implementation Horizon 2026-2030	

Section 2

MCMC P2630 Strategic Implementation

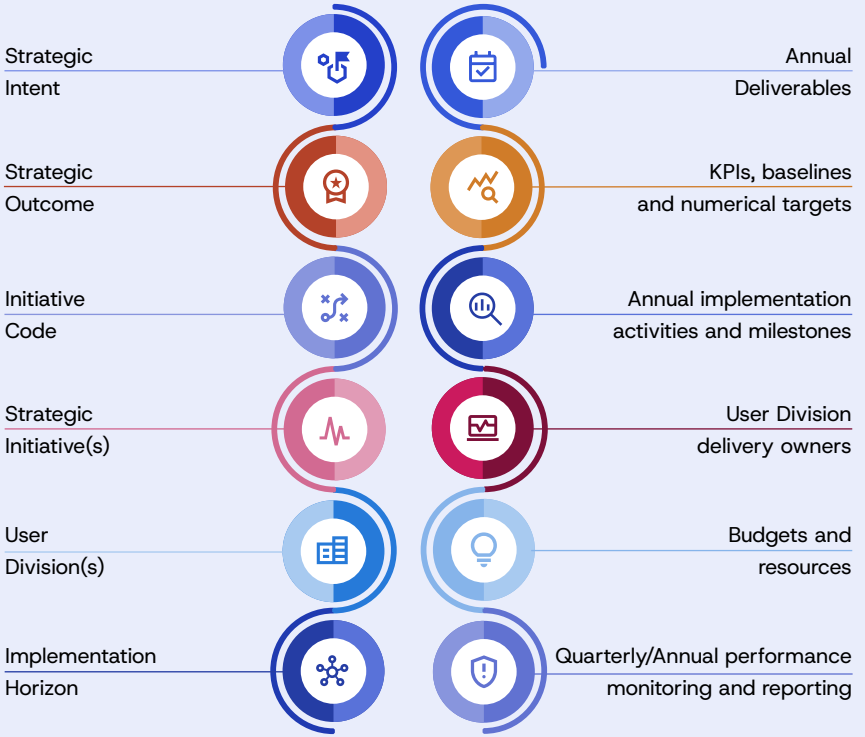

A structured implementation approach that ensures the effective execution of *MCMC P2630* through robust governance, cross-divisional collaboration and performance oversight

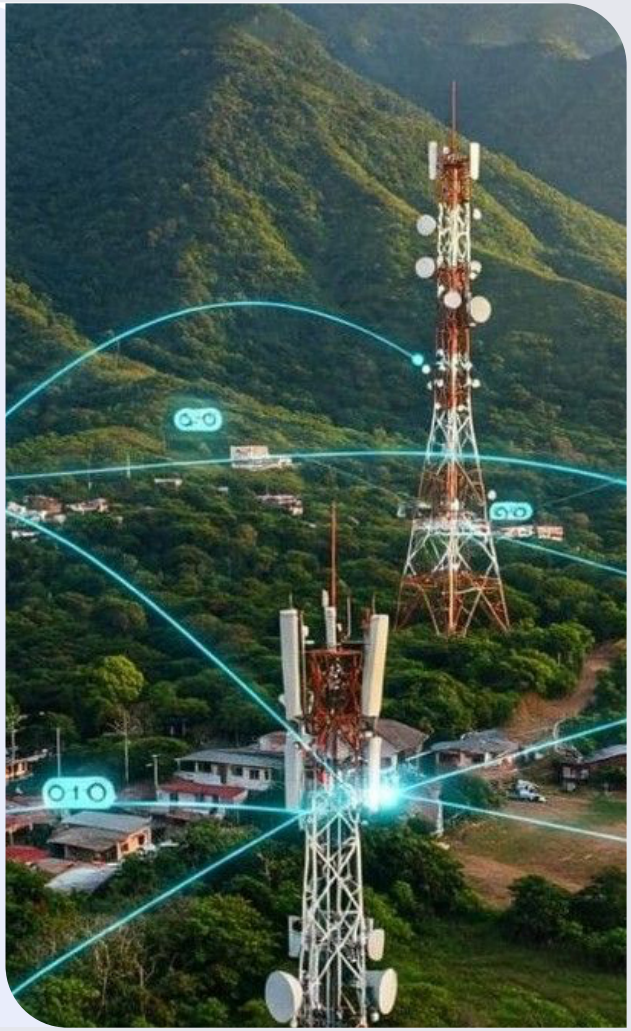

Section 2

Strategic Implementation of *MCMC P2630*

Realising the aspirations of ***MCMC P2630*** requires disciplined execution, clear accountability and continuous performance monitoring. As a living strategy, the Plan remains responsive to evolving national priorities, technological and market developments, and MCMC's operating environment, while maintaining alignment with the strategic direction of the Ministry of Communications.

The Action Plan defines the multi-year strategic portfolio. The AWP translates this portfolio into annual deliverables, KPIs, baselines, targets, milestones, delivery responsibilities and resource requirements. Governance and performance monitoring connect annual implementation evidence to the Plan's Strategic Outcomes and support corrective action and periodic strategic review.

Oversight and Governance of *MCMC P2630*

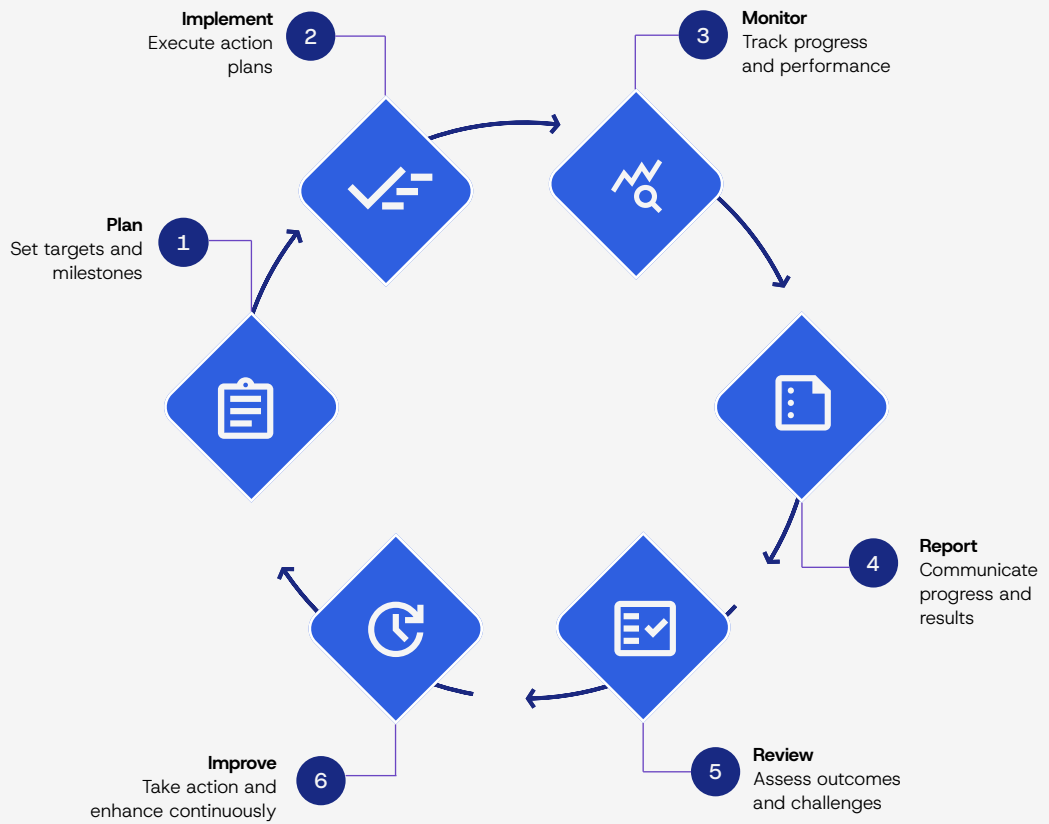

MCMC P2630 Monitoring and Reporting Framework

Effective implementation of ***MCMC P2630*** is supported by a structured monitoring and reporting framework that tracks annual delivery, assesses progress towards Strategic Outcomes and supports informed decisions throughout 2026–2030.

User Divisions report against AWP deliverables, KPIs, baselines, targets and milestones. Performance Monitoring Governance consolidates this evidence, identifies delivery risks and supports timely escalation and corrective action.

Periodic strategic review considers implementation evidence alongside changes in national priorities and the operating environment. This enables MCMC to distinguish delivery issues from matters requiring strategic recalibration with material changes considered through established governance and approval arrangements.

Monitoring and Reporting Cycle

Key Elements

Performance Monitoring
Track KPIs, milestones and deliverables

Regular Reporting
Quarterly and annual reports

Performance Reviews
Assess results, identify gaps and risks

Risk and Issue Management
Proactively manage issues and escalate as needed

Continuous Improvement
Drive lessons learned and improve execution

Reporting Frequency

Frequency	Focus	Purpose	Output
Quarterly	AWP Performance	Monitor implementation of annual deliverables, KPIs, targets and risks	Quarterly AWP Performance Update
Annually	*MCMC P2630* Progress	Assess progress towards strategic outcomes, milestones and overall strategic alignment	Annual Strategic Review
Periodic	*MCMC P2630* Review and Refresh	Review and recalibrate strategic priorities in response to emerging priorities, material changes or significant risks	Approved Strategic Recalibration / Corrective Action

MCMC P2630 will be periodically reviewed to maintain alignment with national priorities, the Ministry of Communications' direction, technological and market developments, and MCMC's operating environment. Material changes to Strategic Outcomes, scope or accountability will be considered through established governance and approval arrangements.

Governance Structure

MCMC P2630 governance connects strategic direction, thrust leadership, portfolio stewardship, performance monitoring and divisional delivery. Management considers strategic decisions and cross-cutting issues, supported by Chief Officers, the Strategy Planning Division and accountable User Divisions.

Within SPD, Strategy and Foresight Department (SFD) is the strategic custodian of ***MCMC P2630*** and Corporate Performance Department (COPD) is the business owner of Performance Monitoring Governance. This arrangement links AWP delivery evidence to strategic review while preserving User Divisions' accountability for implementation.

Key Enablers of Governance

- Strategic oversight and direction
- Cross-divisional coordination and collaboration
- Performance monitoring and review
- Timely escalation and resolution of issues
- Accountability for Implementation outcomes

Governance Roles and Mechanisms

1 Management

Provides strategic oversight, considers key decisions, resolves cross-cutting issues and reviews overall progress.

2 Chief Officers

Provide leadership and oversight for respective areas, address delivery dependencies and escalate matters requiring Management decisions.

3 User Divisions

Implement assigned Strategies and initiatives, manage delivery risks, maintain reliable implementation evidence and report progress.

4 Strategy Planning Division

Integrates strategic stewardship, annual planning and governance reporting through its respective departmental responsibilities.

5 Performance Monitoring Governance

Consolidates performance evidence, supports implementation reviews and escalates delivery risks through the endorsed governance arrangements.

Strategic Operationalisation through the Annual Work Plan (AWP)

Cascading Strategy into Annual Work Plan (AWP)

MCMC P2630 is operationalised through the AWP, which translates the Plan's Vision, Missions, Strategic Thrusts, Strategies and Enabling Initiatives into annual programmes and delivery commitments. This cascade enables User Divisions to align their work plans with the intended Strategic Outcomes.

Strategic-To-Operational Cascading Framework

A Living Strategy
Continuously refined to respond to changes in government policy, market conditions, technological developments, regulatory requirements and organisational priorities.

4 Enabling Initiatives (Cross-Cutting Enablers)

E.1 – Performance Monitoring Governance
Establish and implement Performance Monitoring Governance for ***MCMC P2630***, linking AWP delivery reporting, performance reviews and escalation to periodic strategic review.

E.2 – Digital Implementation Dashboard
Develop a digital dashboard for implementation monitoring.

E.3 – ASEAN and Global Strategic Partnerships
Establish strong partnerships in the ASEAN and global arena.

E.4 – Strategic Stakeholder Communications
Strengthen strategic communications and stakeholder engagement for ***MCMC P2630***.

The AWP establishes clear ownership, deliverables, timelines and performance measures for each initiative, enabling divisions to contribute towards the achievement of ***MCMC P2630*** in a coordinated and measurable manner. This approach strengthens accountability, facilitates resource planning and ensures that implementation progress can be systematically monitored under the Commission's oversight.

Performance Measurement and Annual Target-Setting through Annual Work Plan (AWP)

This Action Plan sets out the Strategic Intent, Strategic Outcome, Initiative Code, Strategic Initiative(s), User Division(s) and Implementation Horizon, where applicable, for MCMC's multi-year portfolio through 2030. As a living strategy, ***MCMC P2630*** remains responsive to changes in government policy, market conditions, technological developments, regulatory requirements and organisational priorities.

Detailed annual KPIs, baselines, numerical targets, implementation milestones and resource requirements are established through MCMC's Annual Work Plan (AWP). Performance Monitoring Governance tracks annual delivery, while periodic strategic review assesses progress towards Strategic Outcomes and identifies matters requiring corrective action or strategic recalibration.

MCMC P2630

Five (5)-Year Strategic Outcomes, 26 Thrust-Level Strategies Supported by 4 Enabling Initiatives

↓

Governance and Oversight of *MCMC P2630*

Performance Monitoring Governance tracks annual delivery; periodic strategic review assesses progress towards Strategic Outcomes and identifies matters requiring corrective action or strategic recalibration through established governance arrangements

↓

Annual Work Plan (AWP)

Monitored Quarterly

Translate strategies into actionable annual commitments

KPIs and Targets
Define annual KPIs, baselines and numerical targets.

User Division
Assign to relevant user divisions and delivery owners.

Milestones
Set key implementation milestones and deliverables.

Resources
Determine resource requirements and budget alignment.

Glossary

5G	The fifth generation of mobile technologies that connects people, things, data, applications, transport systems and cities in smart networked communication environments. The networks transport a huge amount of data much faster, reliably connect an extremely large number of devices and process very high volumes of data with minimal delay.
AI (Artificial Intelligence)[1]	AI comprises a rich set of methods and disciplines, including vision, perception, speech and dialogue, decisions and planning, problem solving, robotics and other applications that enable self-learning. AI is best viewed as a set of technologies and techniques used to complement traditional human attributes, such as intelligence, analytical ability and other capabilities.
Annual Work Plan (AWP)	The Commission's annual plan that translates organisational priorities into initiatives, deliverables and performance targets to support the implementation of MCMC's strategic direction.
C&M	Communications and Multimedia.
C&M Future Skills Framework (FSF)	Strategic talent development initiative established to develop a unified future skills ecosystem and competency benchmark for MCMC and the communications and multimedia industry, enabling data-driven workforce planning, skills gap identification and long-term talent readiness in an evolving digital landscape.
Centre of Excellence in Ethics for Emerging Technologies (C3ET)	C3ET focuses on "Learn & Certify" by building national AI and emerging technology capabilities through structured upskilling, reskilling and professional certification. C3ET establishes a multi-year Centre of Excellence focused on emerging technology ethics, applied research, capability development and ecosystem collaboration, with the broader objective of strengthening AI capability for the nation.
Circular Economy	The circular economy is a model of production and consumption, which involves sharing, leasing, reusing, repairing, refurbishing and recycling existing materials and products as long as possible. In this way, the life cycle of products is extended.
Climate Technology	Climate technology comprises innovative solutions that aim to combat climate change by slashing emissions and capturing carbon from the atmosphere.
Cross-cutting Enabling Initiatives	Organisation-wide initiatives that support the implementation of multiple Strategic Thrusts and Strategies by strengthening institutional capabilities, governance and delivery.
Dasar Infrastruktur Digital Negara (DIDN)	Malaysia's National Digital Infrastructure Policy, formulated to ensure the continuity of the delivery of resilient, secure and future-ready digital infrastructure services, supporting efforts to strengthen productivity and digital investment through the development of a conducive and competitive digital infrastructure ecosystem.
Dasar Penyiaran Negara (DPN)	Malaysia's National Broadcasting Policy, providing the Government's policy framework, led by the Ministry of Communications, to regulate, coordinate and develop the national broadcasting industry.
Early Warning System (EWS)	A system or set of tools designed to detect and provide timely information about potential threats, risks, or adverse events.
Enterprise Capability Architecture (ECA)	ECA refers to an enhanced workforce capability framework designed to align employees' skills, roles and career pathways with MCMC's organisational and strategic requirements. The framework will be calibrated in 2026, progressively deployed organisation-wide from 2027, and measured from 2028 to support skills-based workforce planning and the development of a more agile and future-ready workforce towards 2030.
Environmental, Social and Governance (ESG)	A set of standards used to measure an organisation's environmental, social and governance performance.

5. Artificial Intelligence, ITUPP Doha, 2026

Information and Network Security (INS) Maturity Index	The INS Maturity Index (INS-MI) is a strategic cybersecurity benchmarking initiative to assess, monitor and strengthen information and network security maturity across the communications and multimedia industry, enabling evidence-based regulatory oversight and continuous improvement in sector-wide cyber resilience.
International Telecommunication Union (ITU)	The United Nations specialised agency for digital technologies (ICTs).
JENDELA 2.0	Driving the next phase of Malaysia connectivity expansion, JENDELA 2.0 focuses on the execution and delivery of infrastructure projects to extend high-quality internet access across underserved areas. Through systematic rollout and site implementation, it accelerates coverage expansion and strengthens the nation's digital backbone. The initiative ultimately enables near-universal and reliable broadband coverage nationwide.
Kempen Internet Selamat 2.0	As part of strengthening digital trust and consumer empowerment, the Kempen Internet Selamat 2026 initiative drives nationwide efforts to raise public awareness on safe and responsible internet usage. Through large-scale outreach programmes, community engagements, and targeted awareness campaigns, it equips individuals, particularly children and families, with the knowledge to navigate the digital space safely. The initiative ultimately enables a safer and more responsible digital environment for users across Malaysia.
Key Performance Indicator (KPI)	A measurable performance metric used to monitor progress towards achieving strategic objectives and intended outcomes.
Low-carbon Economy	A low-carbon economy is designed to minimise the production of greenhouse gas (GHG) emissions while still supporting economic growth and social progress.
MCMC NEXUS	MCMC's digital platform supporting the integration of consumer complaints management with the Consumer Redress Portal (CRP), including the use of Agentic AI.
MCMC Plan 2026–2030 (*MCMC P2630*)	The Commission's five-year institutional transformation and execution framework for 2026–2030 to strengthen MCMC's regulatory capability, organisational readiness and delivery discipline while supporting national and Ministry priorities.
MS QoS	The Mandatory Standards for Quality of Service (MS QoS) is a regulatory framework established by MCMC to ensure that consumers in Malaysia receive high-quality telecommunications services, including cellular voice, mobile broadband, and fixed broadband. By setting specific performance standards and metrics, MCMC aims to safeguard consumer interests, prevent substandard service quality, and promote a competitive and efficient telecommunications market.
AIX (AI Transformation Centre)	The AI Transformation Centre established through collaboration between Multimedia University (MMU) and MCMC to support AI research, innovation, industry collaboration and capability development.
NADI MADANI	National Information Dissemination Centre (NADI) MADANI is one of the initiatives implemented by the Malaysian Communications and Multimedia Commission (MCMC) under the Universal Service Provision (USP).
National Address System (NAS)	A centralised national address framework that standardises and integrates address data across Malaysia, providing a single authoritative source of truth to support nationwide digital services, coordination, and data interoperability.
National Spectrum Outlook	A long-term spectrum planning and refarming aligned to next-generation technologies and global developments.
New Communications Equipment Framework (NCEF)	A regulatory framework governing the approval, certification and deployment of communications equipment to ensure compliance with national technical and regulatory requirements.
New Framework for Cabling Provider Proficiency (NFCP)	A framework for cabling-provider proficiency that strengthens competency and certification requirements in line with evolving industry practices and technologies.

NXT Programme	Under the NXT Programme Framework, the NXT Programme serves as a strategic industry enablement platform to accelerate digital adoption and address connectivity gaps across priority sectors through validated digital solutions, field testing and multi-stakeholder collaboration, supporting evidence-based decision-making and innovation-driven transformation.
Online Safety Act 2025 (ONSA)	Malaysia's legislative framework for addressing harmful online content and the online-safety responsibilities of service providers within its statutory scope.
Pelan Accelerator Kurier Negara 2.0 (PAKEJ 2.0)	A national transformation initiative to modernise and strengthen Malaysia's postal and courier ecosystem through regulatory reforms, industry development measures and service innovation, ensuring a competitive, sustainable and future-ready sector that supports evolving consumer and business needs.
Pemacu Ekosistem dan Ketersambungan Kesihatan Digital Negara (PERSADA)	As part of a whole-of-government effort under the Malaysia Future Healthcare initiative, the Healthcare Connectivity initiative enhances digital infrastructure across public healthcare facilities to support next-generation services. By enabling high-speed connectivity for applications such as electronic medical records and telehealth, it strengthens service delivery and accessibility. The initiative ultimately improves digital healthcare outcomes and patient experience nationwide.
Postal Services Act 2012 (PSA 2012)	A Malaysian federal law enacted to provide for the comprehensive licensing and regulation of the postal services industry. It establishes the legal and operational framework for postal networks, consumer protection, and Universal Service Obligations (USO), which ensure that postal services remain accessible, affordable, and of reasonable quality for all.
Postal Services Fund (PSF)	Proposed funding mechanism to support the provision and sustainability of postal services.
Sambungan Kabel Dasar Laut MADANI (SALAM)	A national submarine cable project designed to strengthen Malaysia's digital infrastructure and improve the resilience and reliability of the country's communications network.
Shared infrastructure	Communications infrastructure jointly utilised by multiple operators to improve efficiency, reduce costs and maximise resource utilisation.
Sovereign AI Cloud	A secure, locally governed cloud infrastructure designed to support AI and data-driven applications while ensuring data sovereignty, strengthening cyber resilience, and enabling trusted digital ecosystems and critical national services.
Standardised viewership	An initiative to develop consistent and transparent audience-measurement methodologies across media and digital platforms.
Strategic Initiative	A key programme, policy, regulatory, institutional or partnership intervention undertaken to implement a strategy.
Strategic Thrust	A strategic priority that sets the overarching direction for ***MCMC P2630*** and guides the development of strategies and initiatives towards 2030
Universal Service (US)	Postal services, including basic postal services determined by the Commission to be provided to consumers throughout Malaysia at the prescribed rates.
Universal Service Obligation (USO)	Regulatory obligations requiring communications service providers to ensure essential communications services remain reasonably accessible nationwide.
Universal Service Provision (USP)	Programmes and funding mechanisms aimed at expanding communications infrastructure and services to underserved and unserved communities.
