*MCMC Plan 2026–2030 (**MCMC P2630**)*
Malaysian Communications and Multimedia Commission (MCMC)

Cover Page Rationale "Collective Momentum"

The MCMC Plan 2026–2030 (***MCMC P2630***) cover design embodies the central idea of collective momentum, where diverse perspectives, strategic priorities and future aspirations converge into one coherent direction for MCMC from 2026 to 2030. The visual composition reflects the journey from multiple inputs towards a unified institutional direction, symbolising how the Plan brings together diverse stakeholders and priorities into a shared vision.

The flowing strands represent the diversity of perspectives, insights and strategic priorities contributing to ***MCMC P2630***, while their convergence into a continuous loop symbolises alignment, integration and a common institutional direction. The visual flow further represents the translation of strategic direction into coordinated actions, milestones and delivery, highlighting ***MCMC P2630*** as not only a strategy, but a connected system that aligns ambition with disciplined implementation.

Overall, the cover establishes ***MCMC P2630*** as a unifying framework for collective progress, bringing together MCMC's diverse sectors, priorities and relevant stakeholders towards a shared direction and coordinated delivery.

Official Logo

MCMC P2630

Logo and Rationale

The MCMC Plan 2026–2030 (***MCMC P2630***) identity represents the Commission's five-year journey towards a more connected, trusted, inclusive and future-ready digital ecosystem. The name links the implementation period, 2026 to 2030, with the Plan's strategic architecture of 30 Strategies: 26 thrust-level Strategies organised under six (6) Strategic Thrusts, supported by four (4) Cross-Cutting Enabling Initiatives.

Inspired by the continuous form of a Mobius strip, the logo conveys continuity, integration and transformation. Its interwoven lines reflect the convergence of telecommunications, broadcasting, postal and courier services, digital platforms and emerging technologies within an increasingly interconnected ecosystem.

The flowing form also represents collective momentum. It brings together MCMC's regulatory, developmental and enabling roles, supported by collaboration across Government, industry, academia and society, towards a shared strategic direction for 2030.

MCMC in 2030 Becoming a Future-Ready Regulator and Strategic Ecosystem Enabler

By 2030, Malaysia's communications and multimedia landscape will be more intelligent, interconnected and complex. Artificial intelligence, advanced connectivity, data-driven services, converging platforms and emerging technologies will continue to reshape how people communicate, how businesses create value and how public services are delivered. At the same time, expectations for trust, safety, inclusion, resilience and regulatory responsiveness will continue to rise.

In this changing environment, MCMC must continue to evolve by strengthening how that mandate is exercised. Building on its institutional foundations and experience as Malaysia's communications and multimedia regulator, MCMC aspires to become more anticipatory in identifying emerging risks and opportunities, more intelligence-led in its decisions, more agile in responding to technological and market developments and more effective in engaging external stakeholders whose input and complementary contributions can support broader ecosystem outcomes.

The MCMC of 2030 will be a future-ready regulator that combines regulatory credibility with strategic foresight and execution. It will use data, technology and evidence to support more responsive regulation, enable responsible innovation while protecting the public interest, strengthen the resilience of communications infrastructure and services, empower consumers and communities, and support the sustainable development of the communications, multimedia and postal sectors.

This transformation also requires MCMC to strengthen itself from within. Future-ready regulation depends on future-ready institutions, supported by capable talent, adaptive governance, modern regulatory tools, stronger effective stakeholder engagement partnerships, and a culture of learning and delivery. MCMC must be equipped to anticipate the implications of technological and market change and support the sectors within its purview in navigating what lies ahead.

MCMC P2630 provides the pathway for this institutional evolution. Through its six (6) Strategic Thrusts, 26 thrust-level Strategies and four (4) cross-cutting Enabling Initiatives, the Plan translates long-term ambition into coordinated organisation-wide action within MCMC. It positions MCMC to deliver its strategic direction with greater coherence, agility and impact, while supporting the Ministry of Communications in advancing the Government's policy priorities. In implementing the Plan, MCMC may draw on relevant stakeholder input and collaboration, where appropriate, to complement its efforts towards broader ecosystem outcomes.

Ultimately, MCMC's transformation towards 2030 is about remaining trusted, relevant and effective in a rapidly changing digital future, protecting what matters today, enabling the possibilities of tomorrow, and ensuring that the communications and multimedia ecosystem continues to create meaningful value for the Rakyat, Industry and Government.

Foreword and Acknowledgement

> Through ***MCMC P2630***, we will strengthen our ability to navigate technological change and ensure that it serves Malaysia's development while expanding opportunities for our people.

Chairman's Foreword

Malaysia's digital future must be shaped in the interests of our nation and its people. As artificial intelligence, advanced connectivity, data and emerging technologies continue to transform the way we live and work, MCMC must remain forward-looking, anticipating their implications and providing clear and effective regulatory direction. Our responsibility is to enable progress while safeguarding the public interest, ensuring that innovation contributes to Malaysia's prosperity and strengthens the trust of its people

Guided by the Government's aspirations for a digitally inclusive, secure and resilient Malaysia, MCMC will continue to align its priorities with the policy direction of the Ministry of Communications. The pace of technological change demands sound judgement, foresight and timely action. We must identify emerging risks early, respond decisively to new opportunities and uphold the standards of governance and accountability upon which public confidence depends.

The MCMC Plan 2026-2030 (***MCMC P2630***) sets the direction for this transformation. Strengthening MCMC as a regulator must ultimately translate into greater value for the Rakyat, Industry and Government through stronger protection for users, a trusted environment for responsible innovation and wider opportunities for Malaysians to participate in and benefit from digital progress. This is the purpose of advancing our regulatory capabilities and the measure of our contribution towards Malaysia's digital aspirations for 2030.

While MCMC remains accountable for delivering this Plan, meaningful progress across Malaysia's digital ecosystem requires the collective commitment of Government, industry, academia and other stakeholders, each within their respective roles and mandates. MCMC will provide regulatory leadership while fostering collaboration to address shared challenges, strengthen public trust and support sustainable growth in the national interest.

As we look towards 2030, MCMC will lead with foresight, act with integrity and place the public interest at the heart of its decisions. Through ***MCMC P2630***, we will strengthen our ability to navigate technological change and ensure that it serves Malaysia's development while expanding opportunities for our people. Our commitment is clear: to help shape a digital future that Malaysians can trust, participate in and benefit from today and for generations to come.

YBhg. Tan Sri Mohamad Salim bin Fateh Din
Chairman
Malaysian Communications and Multimedia Commission

Foreword and Acknowledgement

> By 2030, MCMC must be an organisation that anticipates change, makes sound decisions, and follows through with action. We will judge our success by the value we create for the Rakyat, Industry and Government, and by the trust Malaysians place in the digital ecosystem.

Managing Director's Foreword

The MCMC Plan 2026–2030 (***MCMC P2630***) sets a clear ambition: to build a care, future-ready, intelligence-led regulator that anticipates change, acts decisively and proportionately, and delivers meaningful growth outcomes for the Rakyat, Industry and Government. As technologies advance and markets converge, we must strengthen not only what we regulate, but how MCMC thinks, decides, and delivers.

Strategic foresight, data, and regulatory intelligence will be central to this transformation. By understanding technological, market and societal shifts earlier, we can identify emerging risks and opportunities, make better-informed decisions, and adapt our regulatory approaches based on evidence. These capabilities must translate into better protection for users, more responsive regulation and greater confidence for responsible investment and innovation.

Our responsibility now is to turn ***MCMC P2630*** into action. We will translate its strategic priorities into clear responsibilities, measurable outcomes, and accountable execution across the Commission. Every division must understand and own its contribution. We will track progress, address gaps early and intervene where necessary, judging our performance by the outcomes achieved for the people and sectors we serve.

Delivery will require the strength of the whole organisation. Through a One MCMC approach, we will bring together expertise, information, and capabilities across divisions around common outcomes. Our people are central to this transformation. We will strengthen their ability to understand emerging technologies, analyse complex issues, and exercise sound regulatory judgement, while building a culture of ownership, collaboration, and continuous improvement.

MCMC P2630 will remain a living strategy. We will periodically test our assumptions, learn from implementation, and refine our interventions as technologies, markets and priorities evolve, while remaining firmly grounded in our statutory responsibilities and strategic direction.

By 2030, MCMC must be an organisation that anticipates change, makes sound decisions, and follows through with action. We will judge our success by the value we create for the Rakyat, Industry and Government, and by the trust Malaysians place in the digital ecosystem.

Through ***MCMC P2630***, we will build an MCMC that anticipates, decides, and delivers. That responsibility belongs to all of us.

YBrs. Encik Abdul Karim Fakir Ali
Managing Director
Malaysian Communications and Multimedia Commission

Executive Summary

Malaysia's digital landscape is entering a new era of transformation, driven by rapid technological advancement, evolving market dynamics and changing societal expectations. The rising use of artificial intelligence (AI), cloud computing, digital platforms and data-driven technologies is fundamentally reshaping how people connect, businesses innovate, and governments deliver public services. At the same time, increasing technological convergence, emerging cyber threats and growing demands for trust, inclusivity and resilience require regulatory institutions to continuously strengthen their capabilities and be more adaptive and future-ready.

Recognising these developments, the Government has established a clear national direction through policy documents such as Ekonomi MADANI, Rancangan Malaysia Ke-13 (RMK-13), Pelan Strategik Kementerian Komunikasi 2026–2030 (PSKK 2026–2030), and other national policies for Malaysia's digital development. Within this wider governance landscape, the Malaysian Communications and Multimedia Commission (MCMC) fulfils its statutory mandate under the policy leadership of the Ministry of Communications. The formulation of MCMC P2630 is further complemented by relevant international benchmarks, including the ITU Global Cybersecurity Index, IMD Digital Competitiveness Index and UPU Integrated Index for Postal Development (2IPD), providing comparative perspectives to strengthen the nation's long-term competitiveness and Malaysia's standing in global digital governance.

MCMC Plan 2026–2030 (***MCMC P2630***) has been developed as the Commission's five-year institutional transformation and execution framework for 2026-2030. It strengthens MCMC's regulatory capability, organisational readiness and delivery discipline while supporting national and Ministry priorities. The plan marks the next phase of MCMC's institutional evolution by strengthening organisational capability, regulatory effectiveness and execution excellence to ensure the organisation remains agile, responsive and future-ready in fulfilling its statutory responsibilities.

MCMC P2630 is organised around one (1) Vision, two (2) Missions, an Overarching Theme, six (6) Strategic Thrusts and 30 Strategies. The 30 Strategies comprise 26 thrust-level Strategies and four (4) Cross-Cutting Enabling Initiatives. Together, this architecture provides a clear line of sight from changing ecosystem conditions and national priorities to institutional action and intended outcomes.

The Plan is human-centred. Its Overarching Theme, 'Advancing Inclusivity for the Rakyat, Industry and Government', places lived experience and public value at the centre of strategic delivery. Future Personas are used as a foresight tool to illustrate how connectivity, trust, innovation, sustainability and regulatory capability can shape real outcomes by 2030.

5 Future Personas Categories

MCMC P2630 uses five (5) Future Personas categories to explore intended outcomes, potential risks and institutional capabilities towards 2030. Three (3) categories illustrate envisioned outcomes for the Rakyat, Industry and Government, while the remaining two (2) explore plausible future risks and threats, and the institutional capabilities MCMC needs to develop:

- **Empowering People,** aims to enhance digital inclusion, meaningful connectivity and trusted digital experiences.
- **Driving Industry Growth,** seeks to foster a competitive, innovative and future-ready ecosystem that contributes to Malaysia's economic growth and global competitiveness.
- **Building Trust and Governance,** supports effective regulatory governance and stronger institutional collaboration.
- **Future Threats,** as foresight scenarios to strengthen institutional resilience and effective regulation, and
- **Future-Ready MCMC,** defines the organisational capabilities required for the Commission to remain agile, resilient and effective in an increasingly dynamic environment.

Action Plan

MCMC P2630 will be delivered through the accompanying Action Plan and operationalised annually through MCMC Annual Work Plan (AWP). The Action Plan sets out the multi-year Strategic Intent, Strategic Outcomes, Strategic Initiatives, User Divisions and Implementation Horizons. The AWP translates the portfolio into annual deliverables, KPIs, baselines, targets, milestones, resource requirements and accountable delivery commitments.

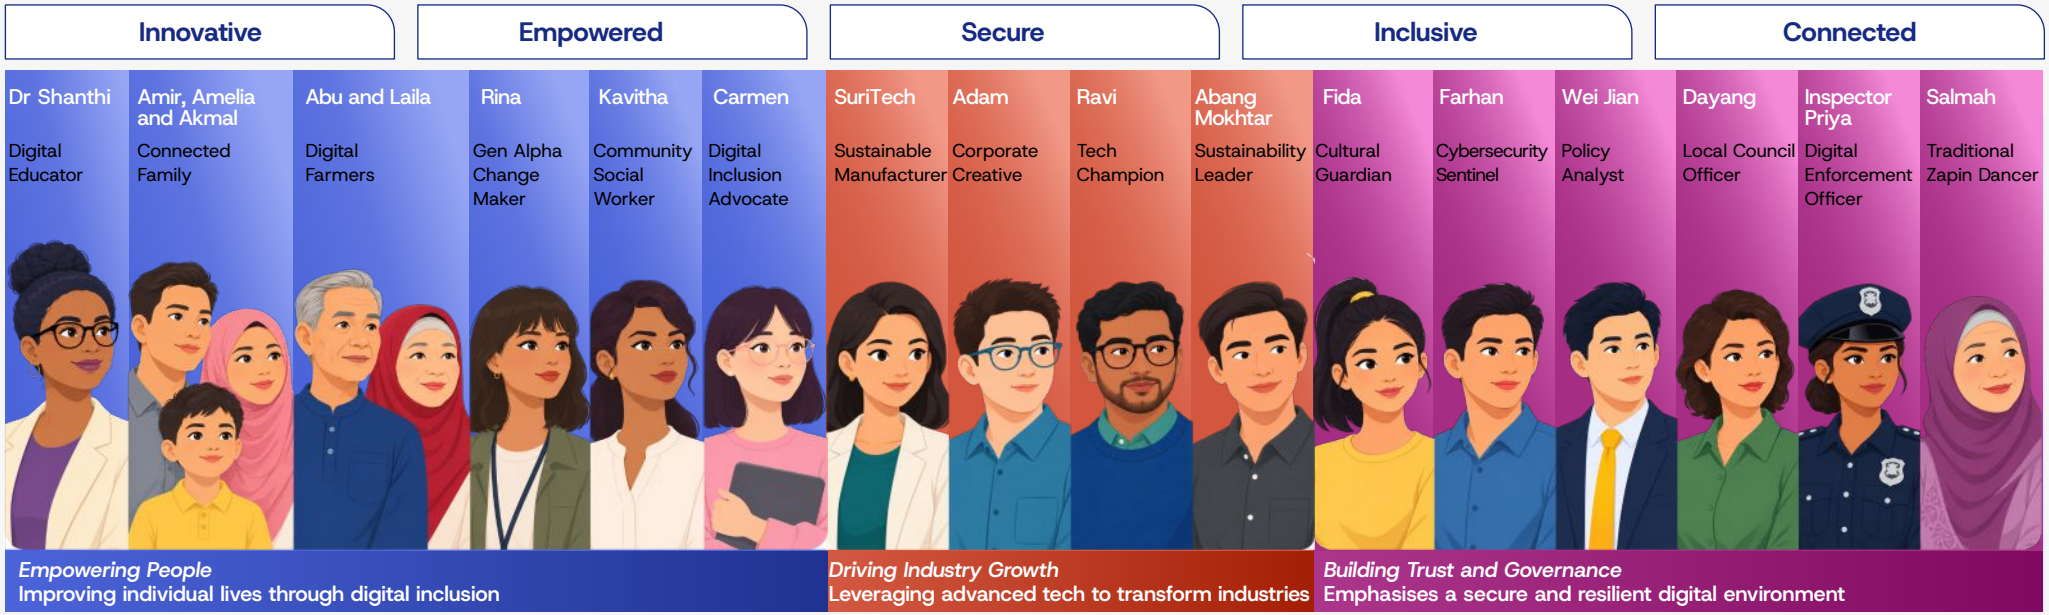

Living Strategy

MCMC P2630 is a living strategy. It will remain responsive to changes in Government policy, technology, markets, risk and organisational priorities while preserving its long term strategic direction. Its success will depend on sustained leadership, organisation-wide ownership, disciplined performance monitoring and constructive collaboration with Government, industry, academia and society.

MCMC P2630 Envisioning the Future Through Personas

24 Future Personas and Foresight Profiles

The 24 Future Personas consisting of 16 desired-outcome personas, three (3) Future Threat Personas and five (5) Future-Ready MCMC Personas. Together, they provide a human-centred perspective on ***MCMC P2630***'s intended contribution to the Rakyat, Industry and Government alongside risks to progress and capabilities needed within MCMC.

These 16 future personas are enabled by the 6 Strategic Thrusts (STs) within *MCMC P2630*

ST1 — Robust Regulatory Frameworks
ST2 — Future-Ready Infrastructure
ST3 — Sustainable and Resilient Ecosystems
ST4 — Innovation-Driven Ecosystems
ST5 — Digital Trust and Consumer Empowerment
ST6 — Progressive Talent and Workforce

MCMC P2630 Envisioning the Future Through Personas

3 Future Threat Personas

The Future Threat Personas present plausible foresight scenarios that highlight emerging risks and vulnerabilities across the communications and multimedia ecosystem. They are designed to stress-test ***MCMC P2630***, supporting proactive regulatory responses and strengthening resilience against future challenges.

Declined in Trust | **Access Exploited** | **Security Bypassed** | **Money Laundered**

@Hens3mb0i

- Self-taught coder, active in online gaming communities
- Uses AI-driven malware and crypto payments
- Targets SMEs, legacy systems, and IoT networks

Jake

- Exploits postal system integrity and security workforce trust
- Leaks/sells customer address, delivery routes, parcel content indicators, high value parcels

Moon

- Digitally skilled, informal technical background (deepfake and AI misuse)
- Leverages automated tools, deepfake generation and hard-to-trace payment channels
- Exploits SMEs, legacy systems and connected digital services

These future threat personas present emerging risks that could undermine trust, security and resilience, highlighting the need for proactive regulatory intervention and ecosystem collaboration.

***MCMC P2630* Counter Measures**

- Digital trust and security
- Emerging technology oversight (AI and IoT controls)
- Cyber resilience and preparedness
- Online Safety Act 2025 (Act 866)
- Cross-sector enforcement

MCMC P2630 Envisioning the Future Through Personas

5 Future-Ready MCMC

The regulatory responses demonstrate how ***MCMC P2630*** addresses emerging risks through adaptive regulation, strengthened digital trust, cybersecurity resilience and cross-sector collaboration, fostering a secure, resilient and future-ready digital ecosystem.

Intelligent Regulation
Integrated, intelligence-led and predictive regulatory approaches

Workforce Transformation
Adaptive, digitally empowered and future-ready talent capabilities

AI-enabled Governance
Responsible AI governance and technology oversight

Digital Trust, AI and
Trust, security, information integrity and ecosystem resilience

The Future Personas should be viewed as strategic foresight artefacts representing emerging institutional capabilities that may become increasingly critical for MCMC towards 2030.

Where We Are Heading to 2030 with *MCMC P2630*

Advancing Inclusivity for the Rakyat, Industry and Government

Strategic Themes Towards 2030

- **Empowered People** — Inclusive, safe and digitally confident.
- **Effective Government** — Agile, data-driven and people-centric.
- **Vibrant Industry** — Innovative, competitive and sustainable.
- **Future-Ready MCMC** — A trusted regulator and key enabler of Malaysia's digital future.

MCMC in 2030

A More Connected, Inclusive, Competitive and Future-Ready Malaysia

2026

2 Meaningful and Resilient Connectivity
Expand access and strengthen network capacity, quality and resilience through JENDELA 2.0, SALAM and connectivity along roads and railways.

4 NADI MADANI Empowerment and Online Safety
Strengthen community skills, entrepreneurship and practical AI use through NADI MADANI, alongside safer and more responsible online

6 Integrated National OTT Platform
Bring Malaysian television and radio content together, expanding audience access and commercial opportunities for local broadcasters and creators.

1 5G Dual 5G Networks and Industry Adoption
Strengthen the dual 5G ecosystem and industry adoption to improve service quality, productivity and competitiveness.

3 PERSADA Digital Health Connectivity
Support connected healthcare through reliable digital infrastructure, enabling telehealth and more integrated health information and services.

5 AI Talent and Future Skills
Develop AI capabilities and relevant industry skills through AIX, C3ET and learning and certification pathways.

7 Sustainability and Progress Towards Net Zero
Advance resource efficiency, circular practices and lower carbon development across the communications, multimedia and postal and courier ecosystem.

These initiatives build on existing progress and advance concurrently towards 2030 and beyond.

Section 1

Why Change is Necessary

Navigating the forces of change that demand a strategic shift in how MCMC regulates, enables and prepares for a future-ready ecosystem.

Section 1 Why Change is Necessary

The world is entering a new phase of digital transformation, where economic prosperity, societal well-being and national competitiveness are increasingly determined by the strength, resilience and trustworthiness of the digital ecosystem. Connectivity has evolved beyond its traditional role in facilitating communication to become a strategic enabler of economic activity, public services and societal participation. As digital technologies become more deeply embedded in everyday life, modern economies, societies and critical services increasingly rely on a digital ecosystem that is secure, resilient and trusted.

This shift aligns with the International Telecommunication Union (ITU) vision of 'universal and meaningful connectivity' ensuring that everyone, everywhere, has access to a safe, satisfying, enriching, and productive online experience at an affordable cost.

Global Trends Shaping the Digital Ecosystem

The digital ecosystem is undergoing profound transformation, driven by technological convergence, accelerating digitalisation, and evolving behaviours and needs. Telecommunications, broadcasting, postal and courier services, online platforms and emerging technologies are no longer advancing independently but are increasingly interconnected within a broader digital ecosystem. In Malaysia, this evolving ecosystem is shaped by five (5) interconnected domains comprising telecommunications, broadcasting, postal and courier services, the online ecosystem, and AI and emerging technologies.

5 Key Focus Areas:

- Telecommunications
- Broadcasting
- Postal and Courier
- Online and Digital Ecosystem
- AI and Emerging Technologies

Emerging technologies such as artificial intelligence (AI), cloud computing, the Internet of Things (IoT), satellite communications, advanced connectivity, automation and data-driven technologies, among others are redefining how networks are built, services are delivered, and values are created. According to the GSMA Mobile Economy 2026, mobile technologies and services are projected to contribute approximately USD11.3 trillion, equivalent to 8.4% of global GDP by 2030, while the global mobile ecosystem already supports 8.8 billion wireless connections and 5.8 billion unique subscribers.[1] The data demonstrate the growing importance of digital technologies as a driver of economic development and competitiveness.

1. GSMA Intelligence, The Mobile Economy 2026.

However, these opportunities are accompanied by risks and challenges. The World Economic Forum Global Cybersecurity Outlook 2026 reports that 94% of respondents view AI as the most significant driver of change in cybersecurity, while 87% identify AI-related vulnerabilities as the fastest-growing cyber risk. Separately, the ITU reports that approximately 99% of international data traffic relies on submarine cable infrastructure, underscoring its critical role in sustaining the global digital economy.[2]

At the same time, critical infrastructure faces growing disruption from geopolitical tensions, cybersecurity threats and climate-related events, reinforcing the need for stronger resilience and continuity across the digital ecosystem. Collectively, these developments highlight the growing importance of digital trust, cyber resilience, secure infrastructure and effective digital governance as essential foundations for a resilient and future-ready interconnected ecosystem.

Key Figures

USD 11.3 Trillion
Projected contribution of mobile technologies and services to global GDP by 2030

8.8 Billion
Global mobile ecosystem already supports 8.8 billion wireless connections

8.4%
Mobile technologies and services are expected to contribute 8.4% of global GDP by 2030

5.8 Billion
Unique mobile subscribers expected globally by 2030

Source: GSMA Mobile Economy 2026

Malaysia's Digital Transformation Landscape

Malaysia is already experiencing this transformation. According to MCMC's Communications and Multimedia Facts and Figures 1Q 2026, Malaysia recorded 49.6 million total broadband subscriptions, comprising 5.1 million fixed broadband and 44.5 million mobile broadband subscriptions. Broadband penetration stood at 49.0 subscriptions per 100 premises for fixed broadband and 129.6 subscriptions per 100 inhabitants for mobile broadband.[3]

Beyond broadband connectivity, Pay TV subscriptions stood at 5.7 million in 1Q 2026, with 99.8% comprising household subscriptions, while Pay TV penetration stood at 61.0 subscriptions per 100 households. The postal and courier sector has also continued to evolve alongside the broader digital ecosystem, with courier traffic reaching 13.6 parcels per capita in 1Q 2026.

Across the ecosystem, digital trust, cybersecurity, artificial intelligence, sustainability, resilience, connectivity quality, digital inclusion and data governance are emerging as strategic priorities that cut across traditional sectoral boundaries.

National Priorities and Strategic Direction

KEMENTERIAN KOMUNIKASI PSKK 2026-2030 | EKONOMI MADANI Memperkasa Rakyat | RMK13 | MD2030

The accelerating pace of global transformation has reinforced the need for a coordinated national response that positions Malaysia to thrive in an increasingly digital, interconnected and technology-driven transformation.

Consistent with this shift, Malaysia's national priorities reflect the need for a coordinated response. Through a range of national development plans, strategies and policy initiatives such as the Ekonomi MADANI, Rancangan Malaysia Ke-13 (RMK-13), Dasar Infrastruktur Digital Negara (DIDN) that is currently under development, National AI Action Plan 2026–2030 and Pelan Strategik Kementerian Komunikasi 2026–2030 (PSKK 2026–2030), Pelan Tindakan Malaysia Digital 2030 (MD2030) among others, the Government has established a clear direction towards building a digitally advanced, inclusive and competitive nation.

These strategies recognise that digital transformation is not an end. Rather, it is a means to improve economic prosperity, strengthen public services, foster innovation and ensure that the benefits of digitalisation are shared across all segments of society.

MCMC's Journey Towards 2030

Established under the Malaysian Communications and Multimedia Commission Act 1998 (Act 589), MCMC was entrusted with regulating and facilitating the development of Malaysia's communications and multimedia sector. Over nearly three (3) decades, the Commission has contributed to the expansion of connectivity, industry development and consumer protection, helping to establish the foundations of Malaysia's digital transformation.

MCMC's mandate remains its anchor, but expectations of the regulator continue to expand as sectors converge and technology evolves. The Commission must regulate effectively while supporting resilience, responsible innovation, inclusion, sustainability and public trust. Meeting these expectations requires stronger institutional capability, closer ecosystem collaboration and a shared strategic direction linking policy, regulation and delivery.

Box Article 1
MCMC Strategic Evolution

MCMC's strategic evolution reflects the Commission's continued contribution towards advancing Malaysia's digital agenda in alignment with national development priorities and the Ministry's policy direction. From establishing the regulatory and industry development foundations to advancing digital infrastructure and connectivity and subsequently translating sectoral strategic priorities into action through initiatives such as Jalinan Digital Negara (JENDELA), Pelan Accelerator Kurier Negara (PAKEJ), and Program Pemerkasaan Pendigitalan Usahawan Kecil (PUPUK). Each strategic phase has responded to the priorities of its time while strengthening the foundations for the next.

2002–2006

Framework for Industry Development (FID)

Laying the regulatory and policy foundations to develop the industry and establish quality standards.

2006–2010

Malaysian Information, Communications and Multimedia Services 886 (MyICMS 886)

Expanding broadband and digital services while strengthening local capabilities and ICT talent.

2010–2015

SKMM Strategic Plan

Strengthening the regulatory framework to promote competition and universal service.

2016–2020

Communications and Multimedia Action Plan (CMAP)

Accelerating digital adoption, growing the digital economy and strengthening network security.

2019–2023

National Fiberisation and Connectivity Plan

Improving network coverage, speed and quality to connect more Malaysians nationwide.

2020–2025

JENDELA | JENDELA+ | PAKEJ | PUPUK | MBIL

Expanding high-speed infrastructure, empowering MSMEs and fostering innovation.

2026–2030

MCMC P2630

MCMC Plan 2026–2030 (*MCMC P2630*)

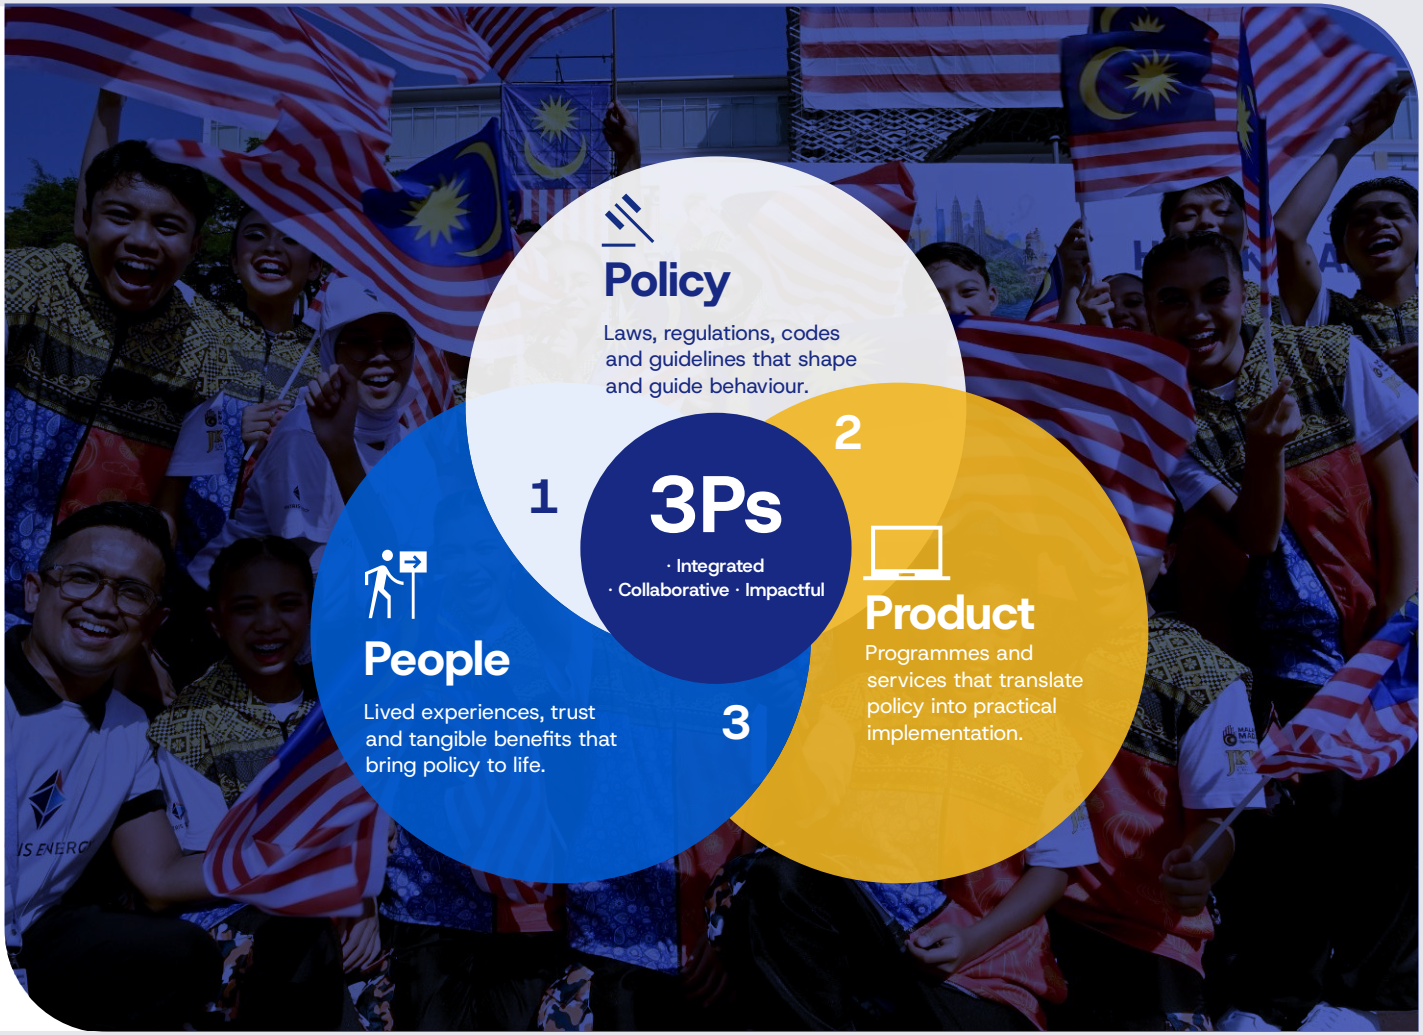

Transforming MCMC to strengthen its contribution to a trusted, inclusive and future-ready ecosystem.

Positioning MCMC for the Future through Policy, Product, People (3Ps)

MCMC P2630 is anchored on the institutional philosophy of Policy, Product and People. The 3Ps provide a practical way to align strategic direction, delivery mechanisms and real-world outcomes.

Under this philosophy, Policy provides strategic and regulatory direction within MCMC's mandate. Product translates that direction into programmes, services and regulatory interventions. People place stakeholders at the centre while strengthening MCMC's talent, leadership, capabilities and culture.

The following section outlines how *MCMC P2630* translates this context into a clear vision, strategic priorities and coordinated execution to strengthen MCMC's contribution to Malaysia's competitiveness.

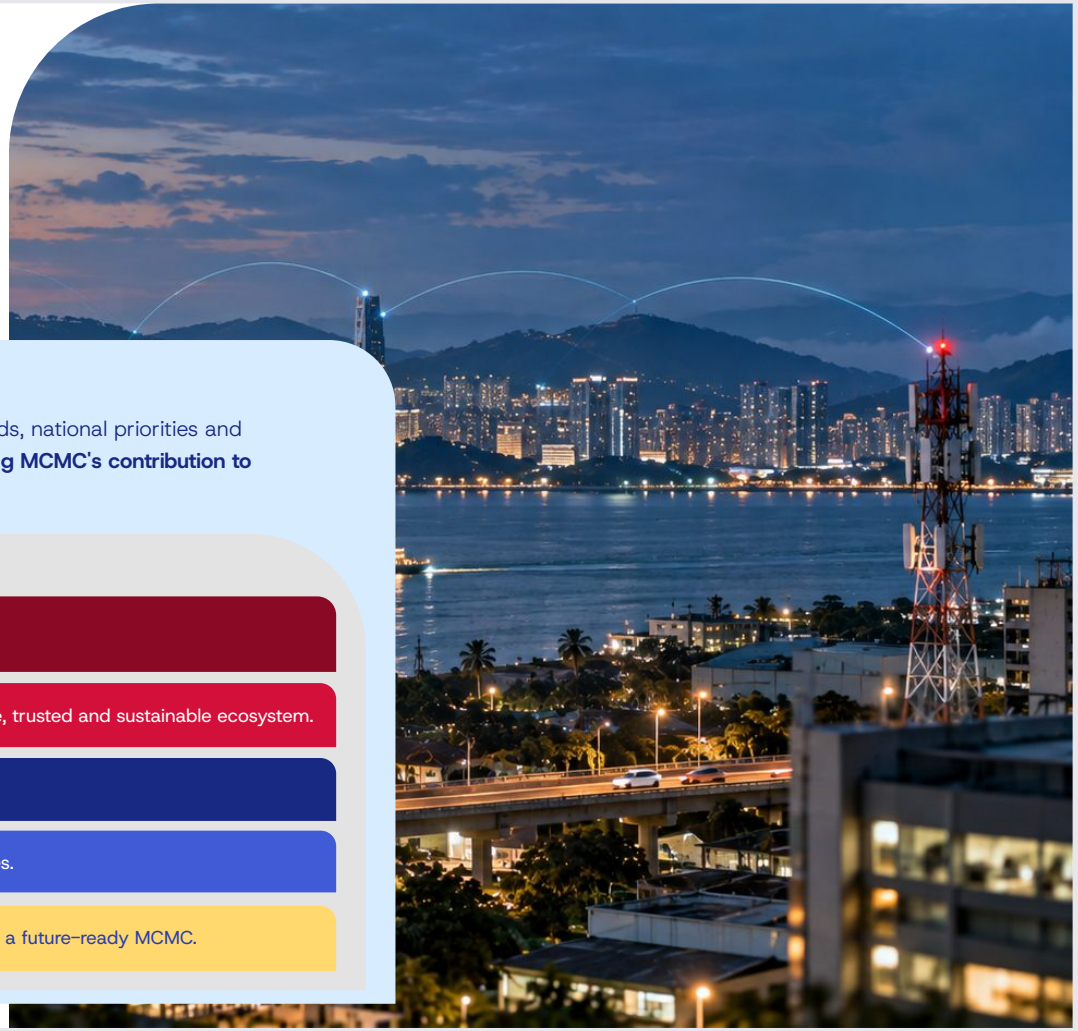

Section 2

MCMC's Strategic Response

Translating strategic intent into clear direction, coordinated execution and meaningful outcomes.

Section 2 MCMC's Strategic Response

The preceding section highlighted the profound shifts reshaping the global digital landscape, driven by rapid technological advancement, evolving societal expectations and increasingly complex geopolitical, economic and technological dynamics. ***MCMC P2630*** translates the changing strategic context into a coherent institutional response. Its architecture connects long-term aspiration with strategic priorities, intended outcomes and coordinated delivery.

Strategic Response at a Glance

MCMC P2630 is underpinned by an integrated strategic framework that translates emerging trends, national priorities and institutional aspirations into a clear Vision, strategic priorities and coordinated action, **strengthening MCMC's contribution to meaningful outcomes for the Rakyat, Industry and Government.**

Overarching Theme	Advancing Inclusivity for the Rakyat, Industry and Government.
Vision	Malaysia as a connected, inclusive, competitive and future-ready nation.
Mission 1	To enable universal and meaningful connectivity.
Mission 2	To cultivate a secure, trusted and sustainable ecosystem.
Strategic Thrusts	Six (6) priorities that guide sectoral transformation and institutional excellence.
Strategies	26 Thrust-Level Strategies supported by four (4) Cross-Cutting Enabling Initiatives.
Outcomes	Meaningful 2030 outcomes for the Rakyat, Industry and Government, enabled by a future-ready MCMC.

Strategic Architecture of *MCMC P2630*

MCMC P2630 has been developed in response to emerging trends, national priorities, future societal needs and the evolving role of the organisation. The development was guided by extensive engagement across MCMC, and enriched by perspectives from ministries, government agencies, industry, and academia ensuring that the plan reflects institutional priorities, ecosystem realities and relevant national aspirations within MCMC's mandate. Together, these considerations shape the strategic architecture of the five (5)-year plan and provide a clear line of sight from strategic intent to meaningful outcomes.

MCMC P2630

Vision

Malaysia as a connected, inclusive, competitive and future-ready nation.

Mission 1

To enable universal and meaningful connectivity.

Mission 2

To cultivate a secure, trusted and sustainable ecosystem.

Theme

Advancing Inclusivity for the Rakyat, Industry and Government

Strategic Thrusts and Strategic Focus

ST1
Robust Regulatory Frameworks
Driving effective regulation and inclusive access through agile planning, spectrum governance and universal service reform.

ST2
Future-ready Infrastructure
Advancing universal and meaningful connectivity through inclusive infrastructure, resilient networks and strategic investment.

ST3
Sustainable and Resilient Ecosystems
Promoting sustainability and resilience through energy-efficient practices, community empowerment and industry development.

ST4
Innovation-Driven Ecosystems
Fostering innovation and local enterprise growth through collaboration, technology adoption and support for emerging solutions.

ST5
Digital Trust and Consumer Empowerment
Strengthening digital trust, online safety, network resilience and accessible consumer protection and redress.

ST6
Progressive Talent and Workforce
Developing a digitally capable workforce and communities through talent intelligence, relevant skills and inclusive innovation and entrepreneurship.

Scope and Strategic Coverage of *MCMC P2630*

MCMC P2630 adopts an integrated and cross-sectoral approach encompassing three (3) core sectors and two (2) emerging strategic areas relevant to MCMC's mandate.

The framework recognises that convergence across telecommunications, broadcasting, postal and courier services, online platforms, AI and emerging technologies is reshaping the operating environment within MCMC's statutory remit. Through this integrated structure, ***MCMC P2630*** seeks to strengthen regulatory and institutional coherence and regulatory agility, supporting a trusted, inclusive and future-ready ecosystem.

Core Sectors

Telecommunications Sector

Focused on engineering national connectivity, resilient infrastructure, optimal regulation, future industry readiness and digital inclusion.

Broadcasting Sector

Focused on future-ready broadcasting, content ecosystem development, efficient oversight, digital broadcasting transformation and responsible content governance.

Postal and Courier Sector

Focused on modernising the logistics ecosystem, strengthening last-mile connectivity, improving track and trace, and integrating e-commerce growth.

Emerging Strategic Areas

Online and Digital Ecosystem

Focused on digital platforms, online safety, consumer empowerment, digital trust and governance, and collaborative ecosystem regulation.

AI and Emerging Technologies

Focused on future technologies, AI innovation and emerging technologies such as 5G/6G and satellite, while promoting secure and responsible technology adoption and experimentation.

Overarching Theme

Advancing Inclusivity for the Rakyat, Industry and Government

Across the Rakyat, Industry and Government outcomes, ***MCMC P2630*** seeks to strengthen MCMC's contribution to a connected, trusted and future-ready Malaysia where no one is left behind.

The inclusivity agenda is realised through six (6) interconnected priorities across these three (3) stakeholder groups. ***MCMC P2630*** seeks to strengthen MCMC's contribution to a connected, trusted and future-ready Malaysia where no one is left behind.

Rakyat

Empowering every individual to participate, connect and thrive in the digital era.

Universal and Meaningful Connectivity	Ensuring nationwide, resilient and affordable connectivity for all, leaving no one behind.
Equitable Access to Digital Opportunities	Bridging digital divides and empowering individuals and communities through skills, awareness and access.

Industry

Building a competitive, innovative and proactive digital industry.

Industry Growth Driven by Innovation	Unlocking inclusive productivity and sustainable economic growth through future-ready ecosystems.
Sustainable Ecosystem for the Future	Building a resilient, vibrant and future-ready digital ecosystem across key sectors.

Government

Delivering agile, transparent and citizen-centric digital governance.

Effective Regulatory Governance	Strengthening transparent, adaptive and data-informed regulatory governance within MCMC's remit.
Coordinated Regulatory and Enforcement Response	Strengthening coordination with the Ministry, relevant agencies and enforcement partners on cross-cutting communications and multimedia matters.

The Vision

Malaysia as a Connected, Inclusive, Competitive and Future-Ready Nation.

The Vision articulates MCMC's aspirations to support Malaysia's transformation into a digitally empowered nation capable of thriving in an increasingly interconnected global environment.

The Vision is underpinned by four (4) interconnected aspirations that collectively articulate how ***MCMC P2630*** supports national aspirations:

Connected	Reliable and resilient communications infrastructure enables people, businesses and essential services to connect wherever needed.
Inclusive	The benefits of connectivity, digital services and participation extend to underserved and vulnerable communities without leaving anyone behind.
Competitive	A dynamic and competitive ecosystem that fosters innovation, attracts investment and strengthens productivity and industry capabilities for sustainable growth.
Future-ready	Institutions, infrastructure, industry and society can anticipate change, manage emerging risks and adopt technology responsibly.

The Missions

- **To Enable Universal and Meaningful Connectivity.**
- **To Cultivate a Secure, Trusted and Sustainable Ecosystem.**

To realise the Vision, ***MCMC P2630*** is guided by two (2) complementary mission statements to strengthen Malaysia's digital ecosystem.

The two (2) Missions guide MCMC's contribution to a secure, trusted, sustainable and meaningfully connected ecosystem.

Mission 1 – To Enable Universal and Meaningful Connectivity	Mission 2 – To Cultivate a Secure, Trusted and Sustainable Ecosystem
• Affordable and accessible connectivity	• Strengthen digital trust and cybersecurity
• Resilient networks	• Enhance consumer protection
• Universal access across all communities	• Foster responsible digital ecosystem governance
• Safe and secure online environments	• Promote sustainable industry growth
• Digital skills for new opportunities	• Advance ethical technology adoption
• Reliable and available connectivity infrastructure	• Build long-term ecosystem resilience

Both missions reflect MCMC's balanced approach to enabling growth while safeguarding public interest, trust and sustainability.

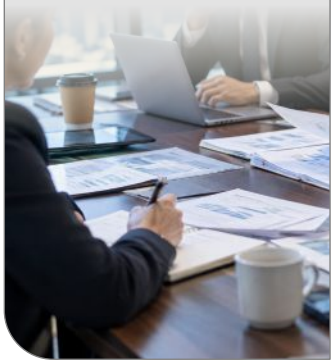

Strategic Thrusts Six (6) Priorities That Guide Sectoral Transformation and Institutional Excellence

MCMC P2630 is operationalised through six (6) strategic thrusts that collectively drive sectoral transformation and organisational excellence in support of national digital aspirations. The summaries below describe the focus of each Strategic Thrust. The detailed thrust pages set out the intended outcomes by 2030 and the Strategies that support them.

Each thrust addresses current priorities and strengthens MCMC's contribution to a future-ready ecosystem.

ST1
Robust Regulatory Frameworks

Driving effective regulation and inclusive access through agile planning, spectrum governance and universal service reform.

ST2
Future-Ready Infrastructure

Advancing universal and meaningful connectivity through inclusive infrastructure, resilient networks and strategic investment.

ST3
Sustainable and Resilient Ecosystems

Promoting sustainability and resilience through energy-efficient practices, community empowerment and industry development.

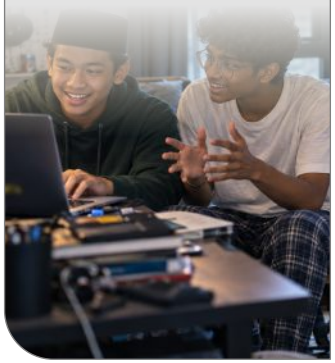

ST4
Innovation-Driven Ecosystems

Fostering innovation and local enterprise growth through collaboration, technology adoption and support for emerging solutions.

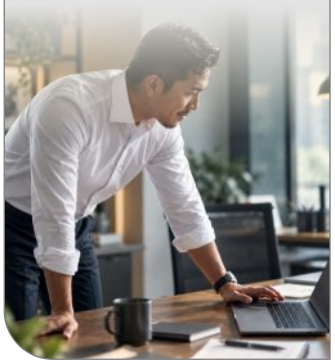

ST5
Digital Trust and Consumer Empowerment

Strengthening digital trust, online safety, network resilience and accessible consumer protection and redress.

ST6
Progressive Talent and Workforce

Developing a digitally capable workforce and communities through talent intelligence, relevant skills and inclusive innovation and entrepreneurship.

Box Article 2: ITU on Universal and Meaningful Connectivity (UMC)

The MCMC Plan 2026–2030 (***MCMC P2630***) closely reflects the principles of the ITU's Universal and Meaningful Connectivity (UMC) framework. ITU defines UMC as the possibility for everyone to enjoy a safe, affordable, satisfying, enriching and productive online experience. Moving beyond the traditional focus on expanding network coverage, UMC recognises that meaningful digital participation depends on six (6) interdependent dimensions: quality, availability, affordability, security, devices, and skills.

Quality
Connections are reliable, sufficiently fast and fit for purpose.

Availability
People can connect wherever they live and work.

Affordability
Connectivity and devices are reasonably affordable.

Security
People can participate with trust, appropriate protection and confidence.

Devices
People have access to suitable and up-to-date devices.

Skills
People have the skills and confidence to use connectivity meaningfully.

Together, these dimensions ensure that connectivity translates into meaningful social and economic outcomes for individuals, businesses and communities.

5.International Telecommunication Union (ITU), Universal and Meaningful Connectivity (UMC): About UMC, 2023.

Section 3

Success by 2030

Envisioned outcomes under *MCMC P2630* expressed through Future Personas that illustrate what success could look like by 2030.

Section 3 Success by 2030

By 2030, ***MCMC P2630*** seeks to strengthen MCMC's contribution to an inclusive, trusted and future-ready communications and multimedia ecosystem, supporting meaningful participation, responsible industry innovation and effective regulatory governance. Success will be reflected not only in completed programmes, but also in the conditions experienced by people, industry and institutions.

Rakyat

Digitally Empowered Society
Every individual has access to the skills, tools and opportunities to participate and thrive in the digital future.

Safe Online Experience
People enjoy a safe, trusted and positive online environment, with strong protection for their rights, safety and well-being.

Inclusive Participation
No one is left behind. All communities, including the underserved and vulnerable, can participate and benefit equally in the digital economy.

An Accessible, Inclusive Digital Future
An inclusive and ethically driven digital future for Malaysia.

Industry

Competitive and Innovative Ecosystem
A competitive, innovative and sustainable industry ecosystem supported by proportionate regulation, responsible technology adoption and future-ready capabilities.

Sustainable and Resilient Industry Growth
Resilient and future-ready industries that leverage digitalisation, green technologies and talent to drive sustainable growth.

AI-Enabled Economy
Widespread adoption of AI and emerging technologies across sectors, empowering businesses, workers and society.

A Robust, Value-Driven Digital Industry
Supporting responsible innovation, competitiveness and sustainable industry growth.

Government

Effective Regulatory Governance
Transparent, adaptive and proportionate regulatory governance that strengthens trust and confidence.

Coordinated Regulatory and Enforcement Response
Coordinated engagement with the Ministry, relevant agencies and enforcement partners on cross-cutting communications and multimedia matters.

Data-Driven Decision-Making
Responsible use of data and regulatory intelligence to support evidence-based decisions within MCMC's remit.

Robust, Transparent and People-First Governance
Effective, transparent and adaptive regulatory governance that strengthens trust and supports coordinated regulatory outcomes.

MCMC

Future-Ready Regulator
A forward-thinking regulator that embraces change and thrives in a constantly evolving digital ecosystem.

Anticipatory Regulation
Adaptive, risk-based and technology-aware regulation that enables innovation while protecting the public interest.

Agile Institution
A high-performing, data-driven and collaborative organisation with the capabilities, culture and leadership to deliver impact.

A Trusted, Agile and High-Impact Organisation
Enabling Malaysia's digital future.

Success by 2030 at a Glance
The future we are building together

Underpinned by Strategic Enablers

- Rakyat
- Industry
- Government
- MCMC

Trust and Safety
Building a safe, secure and trusted ecosystem

Cyber Resilience
Strengthening defence against evolving threats

Inclusivity
Ensuring no one is left behind

Sustainability
Advancing digital sustainability

Collaboration
Partnering across sectors and borders

Innovation
Fostering innovation and future technologies

- Inclusive
- Innovative
- Trusted
- Impactful

Our Commitment

Together, we will strengthen MCMC's contribution to an inclusive, innovative, secure and sustainable digital future, supporting Rakyat, Industry and Government through trusted regulation and coordinated action.

Visualising Societal Outcomes Through Future Personas

As part of ***MCMC P2630***, the Future Personas[6] approach was developed to translate strategic priorities into relatable, human-centred narratives that reflect the evolving realities of Malaysians in an increasingly digital society. Rather than focusing solely on policies, technologies or regulatory frameworks, Future Personas provide an evidence-informed lens to understand how digital transformation may impact the Rakyat, Industry and the Government by 2030.

The Future Personas combine trend intelligence and strategic foresight to embody the societal outcomes envisioned from advances in connectivity, digital innovation and emerging technologies. Through realistic and contextualised Malaysian stories, the personas illustrate how individuals from diverse backgrounds may experience safer online environments, greater digital inclusion, and enhanced economic opportunities within a future-ready digital ecosystem.

Five (5) Dimensions of Societal Transformation

Broadly, the Future Personas highlight five (5) key categories. This approach also reflects national aspirations under Malaysia MADANI by emphasising values such as inclusivity, shared prosperity, resilience, innovation, and human dignity.

By grounding future transformation within relatable societal experiences, the personas help bridge strategic vision with real-world impact, enabling stakeholders to better understand the broader implications of digital transformation on citizens and industries alike.

Empowering People
Empowering individuals and communities through digital inclusion and participation.

Driving Industry Growth
Driving innovation, productivity and industry capability.

Building Trust and Governance
Building trust through a secure, resilient and accountable digital environment.

Future Risks and Threats
Anticipating future risks and strengthening resilience through adaptive governance.

Future-Ready MCMC
Building institutional capabilities, technology adoption and workforce readiness.

6. Pace, L.A., Bruno, C. and Schwarz, J. (2025), "Personas in Scenario Building: Integrating Human-Centred Design Methods in Foresight," Futures, Vol. 166, Article 103539.

Future Personas Development

Future Personas are increasingly being adopted in foresight, policy design and strategic planning practices globally, helping organisations and governments anticipate emerging needs, test future scenarios and design more resilient strategies.

In this regard, ***MCMC P2630*** demonstrates a more progressive and forward-looking approach by embedding future personas as part of its long-term strategic visioning process. The personas integrate multiple dimensions including demographic diversity, emerging technology trends, and future socio-economic shifts to illustrate how digital transformation may impact different segments of society by 2030.

Five (5) Future Personas Categories

The personas bring the envisioned outcomes to life across five (5) key categories where three (3) categories depict desired stakeholder outcomes Empowering People, Driving Industry Growth, Building Trust and Governance while Future Risks and Threats highlight emerging risks and vulnerabilities and Future-Ready MCMC defines institutional capability.

Collectively, these outcome areas provide a structured view of the future envisioned under ***MCMC P2630***, highlighting the outcomes to be achieved, the risks to be anticipated and the capabilities required to realise its strategic aspirations.

Note: Future Personas are fictional representations created for future visioning and illustrations.

Global Benchmarks in Persona-Based Policy Planning

The following examples illustrate how public-sector organisations use personas and related human-centred approaches for different purposes. They provide useful reference points but are not direct equivalents of MCMC's future-oriented foresight method.

Singapore
Citizen-Centric Digital Services
Applies citizen-centred approaches to develop more personalised digital services around users' needs.

UK Government
User-Led Policy Design
Uses personas within open policy-making to build empathy and keep policy development grounded in user research.

New Zealand
Persona-Based Design Thinking
Uses personas as a design-thinking aid to represent user groups and inform policy or service design. Retain only after verifying the exact source.

Australia
Data Workforce Capability
Uses job-role personas to define data responsibilities, capability requirements and career pathways across the Australian Public Service.

7. GovInsider, Power to the People: Making Digital Services Citizen-Centric, 2022.
8. UK Government, Open Policy Making Toolkit: An Introduction to Open Policy Making and Design, 2016.
9. Department of the Prime Minister and Cabinet (DPMC), New Zealand, Personas: Design Thinking Policy Toolkit, 2025.
10. Australian Public Service Commission (APSC), Data Job Role Personas for the APS, 2024.

Box Article 3
International Recognition at WSIS Forum 2026

On 10 July 2026, Human-Centered Digital Governance Through MCMC's Five-Year Plan 2030, now formalised as ***MCMC P2630***, was named a WSIS Prizes 2026 Champion Project under Action Line C6: Enabling Environment.

The recognition affirms MCMC's human-centred and foresight-driven approach to institutional planning. As MCMC's five-year transformation and execution framework, ***MCMC P2630*** translates national and Ministry policy direction into regulatory and organisational priorities, while placing the Rakyat, Industry and Government at the centre of its intended outcomes.

More than an achievement, the recognition reinforces MCMC's commitment to convert its strategic ambition into meaningful outcomes towards 2030 and contribute Malaysia's experience to the global conversation on trusted and future-ready digital governance.

International recognition of human-centered digital governance through MCMC's Five-Year Plan 2030 as a WSIS Prizes 2026 Champion Award.

Outcome for the Rakyat

At the heart of ***MCMC P2630*** is a people-centred ambition to strengthen MCMC's contribution towards a digital transformation whose benefits are shared broadly across society, supported by a trusted, inclusive and future-ready digital ecosystem.

The Empowering People personas illustrate how these outcomes may be experienced across different segments of society and how technology can enable more inclusive participation in education, economic activities and community development.

By 2030, ***MCMC P2630*** aspires to contribute towards a Malaysia in which people are digitally empowered, equipped with the skills and confidence to navigate an increasingly digital society, and able to access trusted digital services and opportunities.

Note: Future Personas are fictional representations created for future visioning and illustrations.

Empowering People

Intended Outcomes

- Digitally empowered and future-ready Malaysians
- Inclusive participation in the digital economy
- Safe, trusted and positive online experiences
- Equitable access to quality connectivity, services and opportunities

What Success Looks Like

- Everyone can access and afford reliable connectivity
- Digital skills and confidence are high
- People feel safe and protected online
- Greater participation in digital services, education, work and entrepreneurship

Key Stakeholders/Partners

- Government and Public Sector
- Industry and Service Providers
- Communities and Civil Society
- Academia and Education

Illustrative Enabling Conditions

- Meaningful connectivity for all
- Digital inclusion and community empowerment
- Digital literacy and future skills
- Online safety and consumer protection
- Accessible and affordable digital services
- Responsible adoption of emerging technologies

Illustrative Future Personas

1. Dr Shanthi

Digital Educator

Uses AI-powered learning tools and digital platforms to deliver accessible, personalised education.

2. Abu and Laila

Digital Farmers

Use IoT sensors, smart farming tools and digital marketplaces to improve productivity and livelihoods.

3. Kavitha

Community Social Worker

Uses digital service platforms and data-driven tools to connect communities with support and opportunities.

Outcome for the Industry

MCMC P2630 seeks to foster a competitive, innovative and future-ready ecosystem that contributes to Malaysia's economic growth and global competitiveness. By enabling advanced infrastructure, technology adoption, investment and innovation, the industry is expected to create greater economic value, develop new business opportunities and strengthen Malaysia's position within the regional digital economy.

The Driving Industry Growth personas demonstrate how emerging technologies and digital capabilities can support businesses in innovating, scaling and competing in increasingly technology-driven markets.

Driving Industry Growth

Intended Outcomes

- Competitive, innovative and future-ready industry
- Sustainable growth and value creation
- Increased investment and global competitiveness
- Thriving digital ecosystem and talent pipeline

What Success Looks Like

- Advanced infrastructure and technologies
- Businesses innovate and scale
- SMEs and startups thrive
- Malaysia is a regional digital leader

Key Stakeholders/Partners

- Government and Public Sector
- Industry and Service Providers
- Communities and Civil Society
- Academia and Education

Illustrative Enabling Conditions

- Future-ready digital infrastructure
- Enabling policies and regulatory support
- Access to funding and investment
- Innovation ecosystems and partnerships
- Digital adoption and capability building
- Open, fair and competitive markets

Illustrative Future Personas

1. **SuriTech**

Sustainable Manufacturer
Leverages IoT, robotics and AI-powered analytics to optimise operations, reduce waste and drive sustainable growth.

2. **Adam**

Corporate Creative
Uses cloud platforms, digital collaboration tools and data insights to create impactful campaigns and drive brand growth.

3. **Ravi**

Tech Champion
Harnesses AI, automation and cloud technologies to build scalable solutions and empower businesses.

Note: Future Personas are fictional representations created for future visioning and illustrations.

Outcome for the Government

As digital technologies become increasingly embedded in society and public services, strengthening trust and governance will be critical to sustaining Malaysia's digital transformation. ***MCMC P2630*** envisions a secure, transparent and accountable digital ecosystem supported by effective governance, responsible technology adoption and strong institutional capabilities.

The Building Trust and Governance personas illustrate how data, emerging technologies and digital tools can support more informed regulatory decision making, enforcement and coordination with relevant public institutions.

Building Trust and Governance

Intended Outcomes

- Trusted digital ecosystem that safeguards rights and promotes responsibility
- Effective, transparent and accountable digital governance
- Strengthened digital trust and confidence across society

What Success Looks Like

- Strong data protection and privacy
- Safe, secure and resilient digital environment
- Integrity in digital content and platforms
- High public trust in digital services and institutions

Key Stakeholders/Partners

- Government Agencies
- Regulators and Law Enforcement
- Industry and Platform Providers
- Civil Society and Advocacy Groups

Illustrative Enabling Conditions

- Robust regulatory frameworks and standards
- Data governance and privacy protection
- Cybersecurity and digital resilience
- Integrity, transparency and accountability
- Multi-stakeholder collaboration and oversight
- Ethical use of technology and AI governance

Illustrative Future Personas

1. 

Dayang Clarice

Local Council Officer

Uses GIS mapping, e-permitting systems and data dashboards to ensure efficient. transparent and accountable local governance.

2. 

Wei Jian

Policy Analyst

Leverages AI analytics, big data and policy Intelligence platforms to analyse trends and design data-driven policies.

3. 

Inspector Priya

Digital Enforcement Officer

Utilises AI-enabled monitoring, cybersecurity tools and threat intelligence platforms to detect risks, prevent cybercrime and protect users.

Note: Future Personas are fictional representations created for future visioning and illustrations.

Future Risks and Threats
What Could Derail Success

Rapid technological change may give rise to increasingly complex risks across Malaysia's communications and multimedia ecosystem. To ensure ***MCMC P2630*** remains resilient and future-ready, a range of plausible future risk scenarios has been developed to explore how plausible emerging threats could affect strategic ecosystem resilience.

The Future Threat Personas are foresight scenarios developed to stress-test the resilience of ***MCMC P2630*** against plausible future risks. Rather than representing predicted or desired outcomes, they challenge strategic assumptions and help identify regulatory, organisational and ecosystem capabilities required to respond effectively under dynamic transformation.

Note: Future Personas are fictional representations created for future visioning and illustrations.

Foresight Scenarios
Future Risk and Threats

Purpose of the Scenarios

These hypothetical foresight scenarios are developed to:

- Stress-test the resilience of ***MCMC P2630***
- Challenge strategic assumptions and preparedness
- Identify emerging regulatory and ecosystem vulnerabilities
- Inform adaptive policy and regulatory responses

What the Scenarios Assess

- Readiness to respond to emerging risks
- Effectiveness of regulatory interventions
- Resilience of the communications and multimedia ecosystem
- Capability to anticipate and adapt to technological disruption

Key Stakeholders/Partners

- Security Agencies
- Industry and Technology Partners
- International Partners
- Communities and Civil Society
- Government Bodies

Illustrative Enabling Conditions

Strategic capabilities strengthened through:

- Horizon scanning and strategic foresight
- Anticipatory and risk-based regulation
- Cyber resilience and digital trust
- Cross-sector collaboration
- Intelligence-led regulatory decision-making
- Continuous monitoring and adaptive governance

Illustrative Future Personas

1. @Hens3mb0i

AI-driven Cyber Intruder

- AI-powered cyber actor exploiting autonomous tools to disrupt critical digital infrastructure.
- Targets communications networks, cloud systems and interconnected digital ecosystems.
- Exploits scale, speed and system dependencies

2. Jake

"Trusted" Insider Exploiter

- Abuses privileged access and organisational trust
- Compromises sensitive systems and information
- Undermines operational integrity and public trust

3. Moon

The Artificial Scammer

- Uses generative AI, synthetic identities and automated deception
- Conducts large-scale fraud, scams and misinformation
- Exploits digital platforms, payment ecosystems and citizen trust

Future-Ready MCMC
What MCMC Must Become

Achieving the outcomes envisioned under ***MCMC P2630*** will require MCMC itself to evolve alongside the ecosystem it regulates. By 2030, MCMC aspires to become a more anticipatory, agile and intelligence-led regulator, supported by advanced technologies, data-driven decision making and future-ready workforce capabilities.

The Future-Ready MCMC personas illustrate how regulatory intelligence, AI-enabled governance, strategic foresight and workforce transformation can strengthen MCMC's ability to navigate complexity and deliver effective regulatory outcomes.

Note: Future Personas are fictional representations created for future visioning and illustrations.

MCMC Becoming a Future-Ready Regulator

The five (5) profiles are strategic foresight artefacts representing institutional capabilities that may become increasingly important for MCMC towards 2030.

Intelligent Regulation
Integrated, intelligence-led and predictive regulatory approaches

AI-enabled Governance
Responsible AI governance and technology oversight

Workforce Transformation
Adaptive, digitally empowered and future-ready talent capabilities

Digital Trust, AI and Governance
Trust, security, information integrity and ecosystem resilience

Illustrative Enabling Conditions
- Anticipatory regulation and foresight capability
- Data, technology and innovation capability
- Agile governance and operating model
- People capability and culture of excellence
- Collaboration and multistakeholder engagement
- Continuous learning and transformation

Illustrative Future Personas

1. Aiman Rahman
Head Digital Intelligence

Focus
Anticipates digital trends and emerging risks to inform regulatory strategy.

Key Technologies
- AI-powered analytics
- Data dashboards
- Threat intelligence
- Predictive modelling

2. Farah Azhani
Regulatory Outcomes Architect

Focus
Designs evidence-based regulation that delivers better outcomes and ensures compliance.

Key Technologies
- Data analytics
- Scenario modelling
- Digital collaboration tools
- RegTech solutions

3. Hafiz Rahman
Financial Intelligence Officer

Focus
Strengthens financial governance and detects risks using advanced analytics.

Key Technologies
- AI and machine learning
- Advanced analytics
- Automated monitoring
- Data visualisation

4. Zara
Cognitive Security Strategist

Focus
Safeguards digital trust by anticipating, detecting and countering evolving threats.

Key Technologies
- Cognitive security
- AI-driven detection
- Behavioural analytics
- Privacy and data protection technologies

5. Danish Darwish
Gen-AI Strategist

Focus
Drives productivity and innovation through AI-powered tools and digital platforms.

Key Technologies
- Generative AI
- Process automation
- Digital platforms
- AI copilots

Section 4

From Strategy to Execution

Translating strategic intent into coordinated action and measurable outcomes.

Section 4 From Strategy to Execution

While Section 3 illustrated what success could look like by 2030, achieving these outcomes requires a clear and coordinated implementation pathway. This section outlines how ***MCMC P2630*** translates strategic intent into action through an integrated framework comprising one (1) Vision, two (2) Missions, six (6) Strategic Thrusts and 30 Strategies: 26 thrust-level Strategies and four (4) cross-cutting Enabling Initiatives that strengthen implementation across the Plan.

MCMC P2630 From Challenges to Strategic Response

1 Vision · 2 Missions · 6 Strategic Thrusts · 30 Strategies
Delivered through 26 Thrust-Level strategies and four (4) Cross-Cutting enabling initiatives.

1. **Digital Disruption and Convergence**
   Rapid technological advances and industry convergence.
2. **Universal Connectivity Gaps**
   Need for universal, meaningful and affordable connectivity for all.
3. **Sectoral Transformation**
   Evolving telecommunications, broadcasting, postal and courier landscapes and business models.
4. **Trust, Safety and Sovereignty Risks**
   Rising cyber threats, online harms, data privacy and digital sovereignty concerns.
5. **Sustainability and Inclusion Needs**
   Climate action, ESG, community empowerment and inclusive growth.
6. **Talent and Execution Readiness**
   Skills gaps, future workforce needs and strong execution capability required.

Strategic Response

Our strategic response to address emerging challenges and opportunities across Malaysia's digital ecosystem.

1 Vision

Malaysia as a connected, inclusive, competitive and future-ready nation.

2 Missions

Mission 1 — To enable universal and meaningful connectivity.
Mission 2 — To cultivate a secure, trusted and sustainable ecosystem.

6 Strategic Thrusts

ST1 — Robust Regulatory Frameworks
ST2 — Future-Ready Infrastructure
ST3 — Sustainable and Resilient Ecosystems
ST4 — Innovation-Driven Ecosystems
ST5 — Digital Trust and Consumer Empowerment
ST6 — Progressive Talent and Workforce

26 Thrust-Level Strategies with 4 Cross-Cutting Enabling Initiatives

Implementation Horizon

Phase 1
Foundation and Alignment (2026–2027)
Build strong foundations, strengthen capabilities and align for future readiness.

Phase 2
Scale and Accelerate (2028–2029)
Scale strategic initiatives and accelerate impact and delivery.

Phase 3
Outcomes and Sustainability (2030)
Realise outcomes and ensure sustainability for long term shared value.

Implementation Horizon

MCMC P2630 will be implemented over 2026–2030 through Initiatives with different starting points, delivery horizons and dependencies. The phases below provide an indicative planning lens. Initiatives may overlap phases and deliver benefits throughout the period. Confirmed initiative horizons are set out in the Action Plan, while annual commitments are established through the AWP.

Delivering *MCMC P2630*

MCMC P2630 establishes the strategic direction through its Vision, two (2) Missions, six (6) Strategic Thrusts and Strategies, supported by four (4) cross-cutting Enabling Initiatives. The Action Plan sets out the multi-year initiatives, ownership and implementation horizons. Annual Work Plans translate these commitments into annual deliverables, KPIs, baselines, targets, milestones and resource requirements. Performance monitoring and strategic review inform corrective action and periodic recalibration.

Vision

Defines the national aspiration to which MCMC contributes.

Missions

Define MCMC's purpose in enabling connectivity and cultivating a secure, trusted and sustainable ecosystem.

Strategic Thrusts and Outcomes

Six (6) Strategic Thrusts define the priorities and intended outcomes towards 2030.

Strategies and Enabling Initiatives

26 thrust-level Strategies and four (4) cross-cutting Enabling Initiatives guide action across the Plan.

Action Plan and Strategic Initiatives

Quantifiable measures used to track progress across initiatives.

Annual Work Plan

Annual deliverables, KPIs, baselines, targets, milestones, resources and delivery responsibilities operationalise the portfolio.

Monitoring and Strategic Review

Performance evidence and changes in the operating environment inform corrective action and periodic strategic review.

MCMC P2630

Building on the implementation approach outlined above, the six (6) Strategic Thrusts serve as the primary vehicles for translating ***MCMC P2630*** into action. Together, they provide a coordinated framework for addressing key ecosystem priorities, guiding implementation efforts and delivering the outcomes envisioned for 2030.

Realising these outcomes will require complementary contributions beyond MCMC. Government ministries and agencies, industry, academia, local authorities and other relevant stakeholders each bring distinct roles, capabilities and expertise that can complement MCMC's regulatory and enabling functions.

Industry Contribution to Broader Ecosystem Outcomes

While MCMC remains accountable for implementing ***MCMC P2630***, progress towards the broader ecosystem outcomes that the Plan seeks to support will also depend on the actions and contributions of industry and other ecosystem stakeholders within respective roles, mandates and capabilities.

Industry can support these outcomes through sustained investment, responsible innovation and technology adoption, secure and resilient service delivery, capability development, and evidence-based participation in regulatory engagement. Through these contributions, industry can help strengthen competitiveness, create value for the Rakyat and support the continued development of Malaysia's communications and multimedia ecosystem.

How Industry Can Contribute

Industry's contribution extends beyond responding to regulatory requirements. Through its investment decisions, operational capabilities, innovation and market expertise, industry can support broader ecosystem outcomes aligned with ***MCMC P2630*** while retaining responsibility for its own commercial and operational decisions.

Invest and Expand	Sustain investment in resilient infrastructure, service quality and future-ready connectivity.
Innovate and Adopt	Advance responsible innovation, commercialisation and adoption of emerging technologies.
Protect and Empower	Strengthen security, consumer safeguards, accessibility and digital inclusion.
Build Capabilities	Develop future-ready talent, organisational capabilities and strategic partnerships.
Inform Policy and Regulation	Provide evidence, operational insights and expertise to support informed and responsive regulation.

MCMC will continue to engage industry and other relevant stakeholders to understand evolving market developments, emerging technologies and sector needs. This engagement will inform MCMC's regulatory and institutional responses and help identify areas where complementary stakeholder action can support broader ecosystem outcomes, while preserving clear roles, mandates and accountability.

Through its investment decisions, operational capabilities, innovation and market expertise, industry can complement MCMC's efforts and contribute to broader ecosystem outcomes relevant to the strategic direction of ***MCMC P2630***, while retaining responsibility for its own commercial and operational decisions.

Delivering Through the *MCMC P2630* Strategic Thrusts

The table below summarises the focus of each Strategic Thrust and its contribution towards achieving ***MCMC P2630***'s strategic aspirations.

Strategic Thrust		No. of Strategies	Areas of Focus
ST1	Robust Regulatory Frameworks	3	Regulatory modernisation, future-oriented governance, public interest protection
ST2	Future-Ready Infrastructure	5	Connectivity expansion, network resilience, future network readiness
ST3	Sustainable and Resilient Ecosystems	6	Sustainability, ecosystem collaboration, community empowerment
ST4	Innovation-Driven Ecosystems	5	Innovation partnerships, emerging technologies, smart ecosystems
ST5	Digital Trust and Consumer Empowerment	5	Digital trust, cybersecurity, consumer protection
ST6	Progressive Talent and Workforce	2	Talent development, future skills, organisational capability
E.1–E.4	Enabling Initiatives	4	Performance Monitoring Governance, implementation monitoring, regional and international partnerships, and strategic stakeholder communications.

Detailed implementation initiatives, timelines and internal ownership arrangements within MCMC will be elaborated in the accompanying *MCMC P2630* Action Plan.

Strategic Thrust 1
Robust Regulatory Frameworks

Robust Regulatory Frameworks

Strategy 1.1 — Establish a future-proof regulatory regime
Cross-sector regulatory architecture covering licensing, market regime, convergence/OTT, regulatory reforms/processes, and enforcement.

Strategy 1.2 — Develop a National Spectrum Outlook for next-generation infrastructure
Long-term spectrum planning and refarming aligned to next-generation technologies and global developments.

Strategy 1.3 — Transform Universal Service Provision and Universal Service Obligation for a competitive future
Nationwide uplift of connectivity coverage, quality, resilience, and affordability.

Strategic Thrust Outcome

Driving effective regulation and inclusive access through agile planning, spectrum governance and universal service reform.

Strategic Thrust 1 under *MCMC P2630* focuses on building a regulatory environment that supports Malaysia's ambition to become a leading digital economy. It plays a pivotal role in ensuring that Malaysia's digital infrastructure, services and ecosystems are governed by principles of accountability, inclusivity and strategic foresight.

It also supports the development of policies and mechanisms that are technically sound and socially responsive, ensuring that regulation serves as an enabler of sustainable growth.

Why It Matters

The rapid convergence of technologies, services and business models is challenging traditional regulatory approaches. To remain effective, regulation must become more agile, future-oriented and responsive to emerging market developments while continuing to safeguard public interests.

Intended Outcome by 2030

A future-ready, trusted and inclusive regulatory ecosystem that enables innovation, strengthens market confidence, optimises spectrum governance, and delivers meaningful connectivity for all.

Strategic Thrust 2
Future-Ready Infrastructure

Future-Ready Infrastructure

Strategy 2.1 — Accelerate resilient and meaningful fit-for-purpose connectivity

Coverage, quality and resilience, including broadband and mobile access for all population segments nationwide.

Strategy 2.2 — Strengthen national disaster and emergency response through advanced mechanisms

Strengthen communications infrastructure to support resilient and interoperable national emergency communications and alerting systems.

Strategy 2.3 — Strengthen national readiness for 5G and next-generation infrastructure deployment

Readiness and enablement measures for advanced mobile and network technologies, and future evolution beyond 5G.

Strategy 2.4 — Strengthen Malaysia's integrated international gateways and connectivity

Facilitate the enhancement of international connectivity, network redundancy and gateway resilience, including submarine cable systems and cross-border infrastructure.

Strategy 2.5 — Modernise national postal infrastructure for a parcel-driven and automated logistics future

Physical and digital infrastructure modernisation for postal and logistics networks.

Strategic Thrust Outcome

Advancing universal and meaningful connectivity through inclusive infrastructure, resilient networks and strategic investment.

Strategic Thrust 2 under ***MCMC P2630*** emphasises the critical role of infrastructure in enabling Malaysia's transition to a digitally empowered society. As digital technologies become increasingly embedded in everyday life, the availability, reliability and inclusivity of infrastructure will determine the success of national development efforts.

In the context of ***MCMC P2630***, ST2 serves as a cornerstone for building a connected nation, where infrastructure supports innovation, empowers communities and ensures continuity in times of crisis.

Why It Matters

As Malaysia's digital economy continues to grow, demand for reliable, resilient and future-ready infrastructure is increasing. Strengthening connectivity foundations is essential to support innovation, economic growth and societal well-being.

Intended Outcome by 2030

A resilient, future-ready and inclusive digital infrastructure ecosystem that delivers reliable connectivity, supports national resilience, enables next-generation network technologies, facilitates more resilient international connectivity within MCMC's mandate and supports a digitally connected economy.

Strategic Thrust 3
Sustainable and Resilient Ecosystems

Sustainable and Resilient Ecosystems

Strategy 3.1 Reinvent service delivery through shared infrastructure to ensure optimum choices

Shared infrastructure and service delivery models to improve efficiency, sustainability, consumer choice and cost optimisation across the sector.

Strategy 3.2 Expand NADI MADANI as Malaysia's community digital empowerment ecosystem

Support community digital inclusion through NADI MADANI platform by enhancing access, digital skills and essential digital services.

Strategy 3.3 Advance sustainability and ESG through sectoral guidelines, standards, capacity building and climate technology adoption

Development of ESG frameworks, standards, indicators and capacity building to drive sustainable and climate conscious practices across sectors within MCMC's purview.

Strategy 3.4 Establish engagements with sectoral players and ecosystem partners to facilitate consultations on industry trends and business diversification

Structured, consultative working groups to communicate sectoral growth, diversification and policy insights.

Strategy 3.5 Embed circular economy and low-carbon principles across sectoral value chain

Promote circular economy practices, low-carbon operations and responsible lifecycle management of ICT assets.

Strategy 3.6 Amplify social impact through collective digital inclusion initiatives

Targeted inclusion initiatives beyond NADI MADANI.

Strategic Thrust Outcome

Promoting sustainability and resilience through energy-efficient practices, community empowerment and industry development.

Strategic Thrust 3 under ***MCMC P2630*** reflects a national commitment to ensuring that digital progress does not come at the expense of ecological or social well-being.

In the context of ***MCMC P2630***, ST3 reinforces the need for a balanced approach to growth, one that integrates sustainability principles, promotes energy efficiency and empowers local communities to participate meaningfully in the digital ecosystem.

Why It Matters

As digital adoption expands across the communications and digital ecosystem, there is a growing need to balance economic growth with environmental sustainability, social inclusion and long-term resilience. Challenges such as unequal access to digital opportunities, increasing environmental pressures, fragmented ecosystem collaboration and evolving sustainability expectations require a more coordinated and inclusive approach. ST3 addresses these challenges by promoting sustainable practices, strengthening ecosystem partnerships, empowering communities through digital inclusion, and embedding resilience principles across sectoral development initiatives.

Intended Outcome by 2030

A collaborative, inclusive and sustainable digital ecosystem that promotes inclusive growth, empowers communities, strengthens industry resilience, and accelerates the transition towards a low-carbon and circular economy.

Strategic Thrust 4
Innovation-Driven Ecosystems

Innovation-Driven Ecosystems

Strategy 4.1 Catalyse R&D ecosystem through strategic partnerships

R&D talent pipeline, applied research, and industry–academia–regulator partnerships.

Strategy 4.2 Integrate emerging technologies into nationwide services

Enable adoption and integration of emerging technologies into public and private sector services at national scale.

Strategy 4.3 Advance cross-sector interoperability via innovation platforms and sandboxes

Use of sandboxes and platforms to test, enable and scale interoperability across sectors and technologies.

Strategy 4.4 Develop Emerging Technology Use Case Catalogue Roadmap

Identify and prioritise high impact emerging technology use cases within MCMC's purview, and develop a catalogue and roadmap to guide responsible piloting, adoption and investment.

Strategy 4.5 Advance smart city innovation through emerging technologies

Frameworks and enablement for scalable, interoperable smart city solutions across Malaysia.

Strategic Thrust Outcome

Fostering innovation and local enterprise growth through collaboration, technology adoption and support for emerging solutions.

Strategic Thrust 4 under ***MCMC P2630*** underscores the importance of fostering a vibrant innovation ecosystem that supports Malaysia's ambition to become a leader in digital technology.

In the context of ***MCMC P2630***, ST4 reflects Malaysia's commitment to nurturing home-grown capabilities, supporting research and development, and embedding innovation into service delivery and business operations. MCMC's open data capabilities also serve as a key enabler, leveraging extensive data assets to drive innovation and support globally aligned, data-driven solutions.

Why It Matters

Rapid technological advancement, increasing global competition and the emergence of transformative technologies require Malaysia to continuously strengthen its innovation capacity and digital competitiveness. To remain future-ready, there is a need to accelerate technology adoption, strengthen research and development capabilities, foster collaboration across sectors and create pathways for innovation to be tested, scaled and commercialised. ST4 addresses these challenges by advancing innovation partnerships, integrating emerging technologies, enabling interoperability, promoting AI-driven innovation and accelerating smart city development.

Intended Outcome by 2030

A collaborative and innovation-driven digital ecosystem that accelerates the adoption of emerging technologies, strengthens cross-sector partnerships, and enables interoperable, AI-enabled and smart digital transformation.

Strategic Thrust 5
Digital Trust and Consumer Empowerment

Digital Trust and Consumer Empowerment

Strategy 5.1 — Establish a national digital trust, safety and network security framework and implementation

Support the implementation of policy and standards frameworks covering digital trust, online safety and network security across the digital ecosystem.

Strategy 5.2 — Elevate national digital trust through comprehensive advocacy and safety programmes

Public-facing advocacy, education and safety programmes to build digital trust and responsible online behaviour.

Strategy 5.3 — Develop a people-centred digital services platform for advisory and redress

Design and rollout of an integrated platform for consumer advisory, complaints and redress.

Strategy 5.4 — Establish a national Sovereign AI Cloud for high trust data and critical services

Subject to formal government mandate and role confirmation, support the development and effective utilisation of secure, resilient sovereign AI-cloud capabilities for approved high trust sectoral or national use cases.

Strategy 5.5 — Standardise viewership and digital measurement across media and platforms

Development of consistent measurement standards for viewership and digital consumption across platforms.

Strategic Thrust Outcome

Empowering users and enhancing digital service delivery through innovation, collaboration and accessible platforms.

Strategic Thrust 5 under ***MCMC P2630*** addresses the growing need to build and maintain trust in digital technologies and services. As digital platforms become increasingly central to how Malaysians work, communicate and access essential services, it is critical that users feel secure, informed and empowered.

In the context of ***MCMC P2630***, ST5 reflects Malaysia's commitment to fostering a trusted digital environment where individuals and organisations can participate and engage with confidence.

Why It Matters

As digital technologies become increasingly embedded in everyday life, maintaining trust, safety and confidence in digital services is becoming more critical. Growing cybersecurity risks, online harms, increasing reliance on data-driven services and evolving consumer expectations require stronger safeguards and more responsive consumer support mechanisms. ST5 addresses these challenges by strengthening digital trust and security frameworks, promoting responsible digital behaviour, improving consumer redress platforms, enabling trusted national digital infrastructure and enhancing transparency through better measurement and insights.

Intended Outcome by 2030

A secure, trusted and resilient digital ecosystem that safeguards users, strengthens digital governance, supports transparent and data-informed regulatory outcomes.

Strategic Thrust 6
Progressive Talent and Workforce

Progressive Talent and Workforce

Strategy 6.1 Develop workforce intelligence and strategic talent frameworks

Workforce intelligence, talent gap analysis and strategic planning frameworks for the relevant sectors within MCMC's purview.

Strategy 6.2 Empower communities through inclusive innovation and entrepreneurship

Programmes supporting inclusive innovation, entrepreneurship and community-based economic participation.

Strategic Thrust Outcome

Developing a digitally capable workforce and communities through talent intelligence, relevant skills and inclusive innovation and entrepreneurship.

- **Strategic Thrust 6** under ***MCMC P2630*** focuses on cultivating a skilled, adaptable and inclusive workforce that can meet the evolving demands of the communications and multimedia industry.
- In the context of ***MCMC P2630***, ST6 reflects Malaysia's commitment to building a resilient and future-ready talent pipeline. It supports inclusive learning pathways, sector-led workforce programmes and strategic frameworks that anticipate future skills requirements.

Why It Matters

The pace of technological change is reshaping workforce requirements across the communications and digital ecosystem, creating increasing demand for future-ready skills, specialised expertise and adaptable talent. At the same time, skills mismatches, emerging talent gaps and unequal access to economic opportunities can constrain long-term growth and competitiveness. ST6 addresses these challenges by strengthening workforce intelligence, improving talent planning, fostering skills development and empowering communities through innovation, entrepreneurship and inclusive participation in the digital economy.

Intended Outcome by 2030

A dynamic and future-ready talent ecosystem that develops digital capabilities, addresses critical skills gaps, fosters innovation and entrepreneurship, and creates inclusive economic opportunities for all.

Cross-Cutting Enabling Initiatives

Cross-Cutting Delivery Enablers for *MCMC P2630*

Enabler E.1

Establish and implement Performance Monitoring Governance for *MCMC P2630*

Provides strategic oversight, coordination and accountability to ensure the effective delivery of ***MCMC P2630***.

Enabler E.2

Develop a Digital Dashboard for Implementation Monitoring

Enables timely tracking of implementation progress, performance and key milestones across the ***MCMC P2630*** portfolio.

Enabler E.3

Establish Strong Partnerships in the ASEAN and Global Arena

Strengthens regional and international collaboration to advance knowledge exchange, strategic influence and ecosystem development.

Enabler E.4

Strengthen Strategic Communications and Stakeholder Engagement for *MCMC P2630*

Enhances stakeholder awareness, alignment and participation through structured communications and engagement.

Intended Outcome by 2030

A coordinated delivery ecosystem that strengthens governance and accountability, enables data-driven performance monitoring, deepens strategic partnerships and stakeholder alignment to ensure effective implementation of ***MCMC P2630***.

Role in Enabling *MCMC P2630* Delivery

As ***MCMC P2630*** comprises multiple Strategic Thrusts, Strategies and initiatives delivered across the organisation, effective implementation requires a set of cross-cutting delivery enablers that support execution across all priorities. These enablers provide the governance, programme management, performance monitoring, stakeholder engagement and partnership mechanisms necessary to coordinate delivery, maintain implementation momentum and strengthen accountability. By operating across and supporting all Strategic Thrusts, the Enabling Initiatives help translate strategic priorities into measurable outcomes and long-term impact.

Key Delivery Enablers by 2030

- Strengthened governance, accountability and decision-making through an integrated programme management and oversight framework.
- Improved visibility of implementation progress and performance through data-driven monitoring and reporting mechanisms.
- Enhanced collaboration and strategic engagement at the national, regional and international levels to complement MCMC's efforts and strengthen its contribution to broader ecosystem outcomes.
- Greater stakeholder alignment, awareness and participation through structured engagement and communication channels.
- More effective and coordinated execution of ***MCMC P2630***, ensuring strategic priorities are translated into measurable outcomes and long-term impact.

Box Article 4
Formalisation of *MCMC P2630* through MCMC Five-Year Plan 2030 Challenge

Held from 7 April to 10 May 2026, MCMC Five-Year Plan 2030 Challenge was an organisation-wide co-creation initiative that invited MCMC staff to help shape the Plan's institutional identity and future orientation.

The Challenge comprised two (2) tracks. The Name and Logo Design Contest sought to establish a distinctive and enduring identity for the Plan, while the Future Personas Contest explored the capabilities, roles and mindsets that may be required as MCMC evolves towards 2030.

The initiative culminated in the formalisation of ***MCMC P2630*** as the official institutional identity for the Plan and the selection of five (5) Future Personas concepts illustrating different dimensions of MCMC's transformation.

The co-creation exercises embedded staff perspectives into ***MCMC P2630***, strengthening institutional ownership and building a shared commitment to MCMC's transformation towards 2030.

Winning Name and Logo Design Contest

MCMC P2630

Implementation and Monitoring of *MCMC P2630*

Effective delivery of ***MCMC P2630*** requires a structured governance framework that provides clear accountability, coordinated execution and continuous performance monitoring across the organisation. As a multi-year transformation roadmap, the implementation of ***MCMC P2630*** requires strong leadership oversight, cross-functional coordination and disciplined execution to ensure strategic priorities are translated into measurable outcomes.

Our Governance Approach

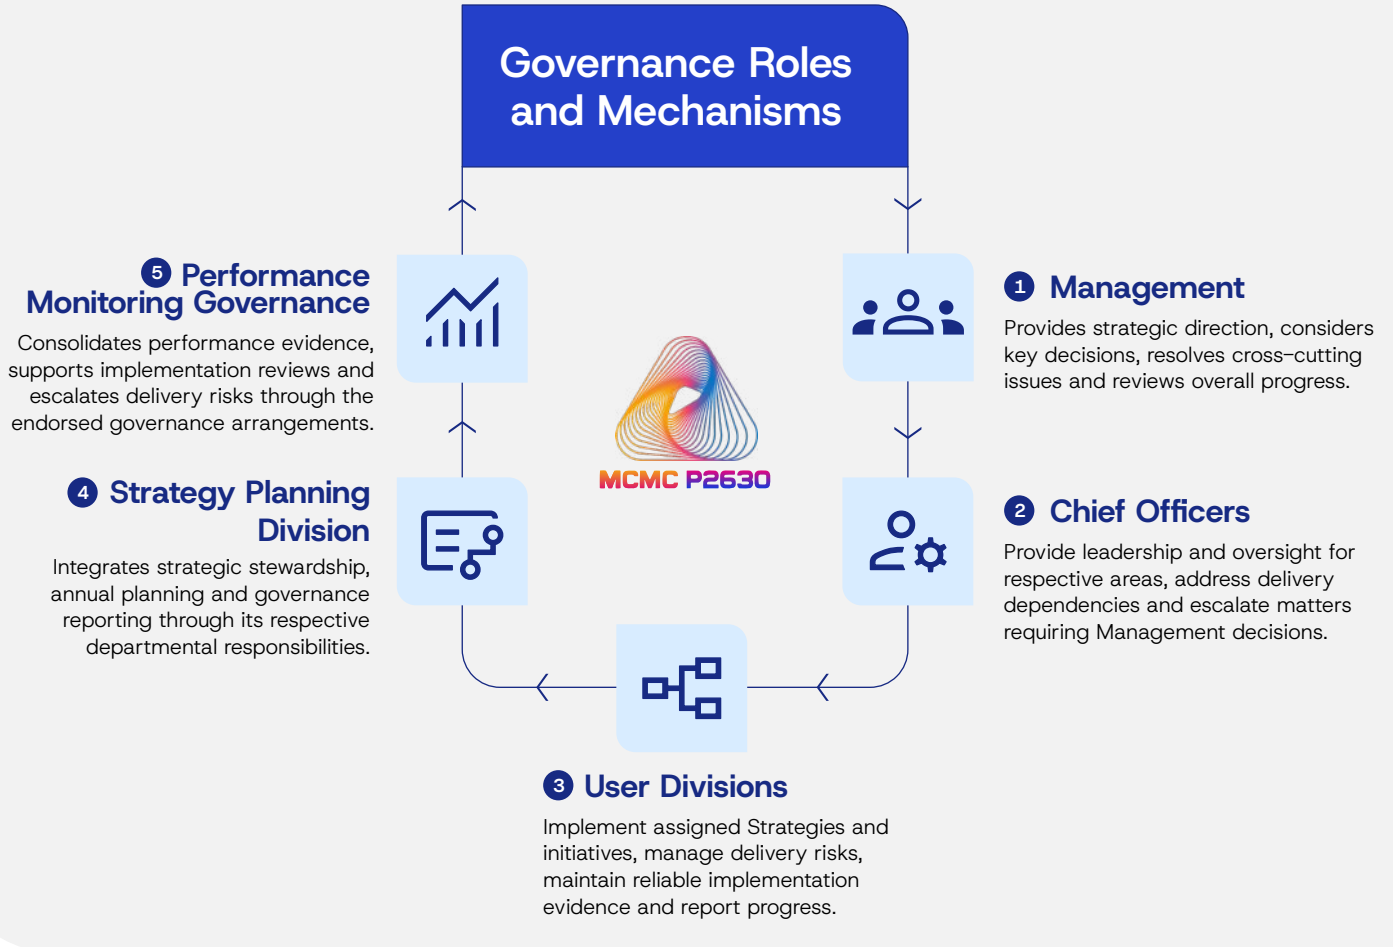

MCMC P2630 is supported by integrated governance arrangements that connect strategic oversight, divisional delivery, performance monitoring and strategic review. Within the Strategy Planning Division, the Corporate Performance Department is the business owner of Performance Monitoring Governance, while the Strategy and Foresight Department is the strategic custodian of MCMC P2630. User Divisions remain accountable for implementation and the accuracy of their progress reports.

Governance Roles and Mechanisms

The figure summarises how Management, Chief Officers, User Divisions and the Strategy Planning Division contribute to delivery, supported by Performance Monitoring Governance. These roles connect strategic direction with implementation, reporting and timely decisions.

Performance monitoring tracks annual delivery and identifies implementation risks. Strategic review assesses progress towards the Plan's intended outcomes and considers changes in the operating environment. Together, these functions support corrective action and proportionate strategic recalibration.

The concluding section reflects on the broader significance of *MCMC P2630* and the collective commitment required to realise its aspirations.

Conclusion and Way Forward

MCMC P2630 sets the Commission's strategic direction for navigating an increasingly dynamic and interconnected digital landscape. Anchored by a clear Vision, two (2) Missions and six (6) Strategic Thrusts, it provides a shared framework to guide decisions, strengthen institutional focus and create lasting value for the Rakyat, Industry and Government.

The Plan's success will depend on disciplined execution, organisation-wide ownership and sustained collaboration across the ecosystem. MCMC will remain accountable for its statutory responsibilities while working with Government, industry, academia and society to align complementary contributions towards shared outcomes.

MCMC P2630 will continue to serve as a living strategy. As technology, markets, risks and stakeholder expectations evolve, MCMC will strengthen its capabilities, refine its responses and preserve a clear line of sight between strategic intent and measurable impact.

Rakyat **Industry** **Government**

> The publication of ***MCMC P2630*** marks an important milestone, but it is ultimately what we do from here that will define its success. Together, our responsibility is to turn strategic intent into sustained action, measurable outcomes and meaningful impact for the Rakyat, Industry and Government.

Chief Corporate and International Officer's Closing Reflection

MCMC P2630 represents more than the completion of a five-year Plan. It reflects a shared commitment across the organisation to strengthen how MCMC anticipates change, responds to emerging challenges and translates strategic priorities into meaningful outcomes.

Its development has been shaped through an organisation-wide co-creation journey, enriched by perspectives from Government Ministries and agencies, industry, academia and other stakeholders. These contributions have helped ensure that the Plan remains grounded in MCMC's statutory responsibilities while remaining responsive to the realities of a rapidly evolving communications and digital ecosystem.

As we move from strategy to execution, the greater task now lies ahead. The success of ***MCMC P2630*** will depend on sustained leadership, disciplined delivery, shared accountability and the ability to adapt as technology, markets and societal expectations continue to evolve. Across MCMC, every Division and Office has a role in translating the Plan's strategic direction into measurable progress and lasting institutional capability.

MCMC will remain accountable for implementing the Plan, while continued engagement with Government, industry, academia and other relevant stakeholders can complement our efforts towards broader ecosystem outcomes. Maintaining clear roles, strong collaboration and a common sense of purpose will be essential as we advance towards 2030.

I would like to record my sincere appreciation to everyone who has contributed to the development of ***MCMC P2630***. The insights, expertise and commitment demonstrated throughout this journey have shaped a Plan that belongs to the organisation as a whole.

The publication of ***MCMC P2630*** marks an important milestone, but it is ultimately what we do from here that will define its success. Together, our responsibility is to turn strategic intent into sustained action, measurable outcomes and meaningful impact for the Rakyat, Industry and Government.

Thank you.

YBrs. Encik Syahrilazli Mahammad
Chief Corporate and International Officer
Malaysian Communications and Multimedia Commission

Acknowledgement and Appreciation

Recognising the contributions that helped shape *MCMC P2630*

MCMC Plan 2026–2030 (***MCMC P2630***) was informed by extensive engagements, written inputs and collaborative discussions with a wide range of stakeholders, including ministries, government agencies, industry players, academia and other partners. These engagements provided valuable insights on stakeholder priorities, industry realities and national aspirations, and helped shape the strategic direction and initiatives in this Plan.

MCMC acknowledges and appreciates the time, expertise and perspectives contributed by all stakeholders and partners throughout this journey.

Co-Creation Journey of *MCMC P2630*

MCMC P2630 was shaped via several engagements with multiple stakeholders to reflect stakeholder priorities, industry realities, and national aspirations.

Feb – Oct 2025
Industry Labs and Workshops, Socialisation with Management

July – Nov 2025
Stakeholder engagements via written inputs

Dec 2025 – Jan 2026
Finalisation

Glossary and Appendices

Glossary

5G	The fifth generation of mobile technologies that connects people, things, data, applications, transport systems and cities in smart networked communication environments. The networks transport a huge amount of data much faster, reliably connect an extremely large number of devices and process very high volumes of data with minimal delay.
AI (Artificial Intelligence)	AI comprises a rich set of methods and disciplines, including vision, perception, speech and dialogue, decisions and planning, problem solving, robotics and other applications that enable self-learning. AI is best viewed as a set of technologies and techniques used to complement traditional human attributes, such as intelligence, analytical ability and other capabilities.[11]
Annual Work Plan (AWP)	MCMC's annual rolling plan that translates organisational priorities into initiatives, deliverables, KPIs, milestones, resources and accountable ownership.
Augmented Reality/Virtual Reality (AR/VR)	Technologies that enhance or simulate digital experiences. AR overlays digital content onto the real world environment, while VR creates a fully immersive, computer generated environment.
Cross-Cutting Enabling Initiatives	Organisation-wide enablers that support implementation across multiple Strategic Thrusts through governance, information, partnerships and communications.
Dasar Infrastruktur Digital Negara (DIDN)	Malaysia's National Digital Infrastructure Policy, currently under development, which aims to ensure the continued delivery of resilient, secure and future-ready digital infrastructure services and support productivity and digital investment through a conducive and competitive digital infrastructure ecosystem.
Digital Ecosystem	The interconnected environment of infrastructure, technologies, platforms, services, users, businesses and governance arrangements supporting digital activity.
Digital Inclusion	The ability of all people and communities to access and benefit from digital infrastructure, services, skills and opportunities regardless of location or socioeconomic background.
Digital Trust	Confidence that digital technologies, networks, platforms and services operate securely, responsibly, transparently and in ways that protect users and the public interest.
Ekonomi MADANI	Malaysia's national economic framework that guides economic transformation through structural reforms to improve the quality of life of all Malaysians and build a more sustainable, inclusive and prosperous nation.
Electronic Know Your Customer (eKYC)	A digital identity verification process that enables organisations to verify customers electronically using digital technologies and biometric authentication.
Emerging Technologies	Innovative technologies across fields such as artificial intelligence (AI), blockchain, the Internet of Things (IoT) and fifth-generation (5G) wireless technology, which continue to evolve rapidly and present new opportunities and challenges.
Future Personas	A human-centred foresight tool representing a plausible future individual, organisation or stakeholder experience used to test needs, outcomes and strategic assumptions.
Geographic Information System (GIS)	A framework that provides the ability to capture and analyse spatial and geographic data.
International Telecommunication Union (ITU)	ITU is the United Nations specialised agency for digital technologies (ICTs).
ITU Global Cybersecurity Index (GCI)	An index developed by the International Telecommunication Union (ITU) that assesses countries' commitment to cybersecurity across five pillars: legal measures, technical measures, organisational measures, capacity development, and cooperation. It provides a benchmark for comparing national cybersecurity efforts and identifying areas for improvement.
IMD Digital Competitiveness Index	Officially known as the IMD World Digital Competitiveness Ranking, an annual assessment published by the International Institute for Management Development (IMD) that measures economies' capacity and readiness to adopt and use digital technologies to drive transformation in business, government, and society. It assesses three factors: knowledge, technology, and future readiness.

11. Artificial Intelligence, International Telecommunication Union (ITU), 2023

Internet of Things (IoT)	A network of physical devices, vehicles, appliances, and other physical objects that are embedded with sensors, software, and network connectivity, allowing them to collect and share data.
Jalinan Digital Negara (JENDELA)	Malaysia's national digital-infrastructure programme to improve the coverage and quality of broadband services and strengthen the country's connectivity foundations.
Malaysian Broadcasting Industry Lab (MBIL)	A collaborative platform that brings together broadcasting industry stakeholders to explore, develop and test innovative technologies, solutions and approaches for the advancement of Malaysia's broadcasting ecosystem.
MCMC P2630	The Commission's five (5)-year institutional transformation and execution framework for 2026-2030 to strengthen MCMC's regulatory capability, organisational readiness and delivery discipline while supporting national and Ministry priorities.
NADI MADANI	National Information Dissemination Centre (NADI) is one of the initiatives implemented by the Malaysian Communications and Multimedia Commission (MCMC) under the Universal Service Provision (USP).
National AI Action Plan 2026-2030	Malaysia's AI implementation roadmap aimed at positioning Malaysia as an AI Nation by accelerating the responsible adoption, development and governance of Artificial Intelligence (AI) across the economy, government and society.
Pelan Accelerator Kurier Negara (PAKEJ)	A strategic roadmap to improve and regulate Malaysia's postal and courier service industry.
Pelan Strategik Kementerian Komunikasi 2026-2030 (PSKK 2026-2030)	Serves as the strategic direction and framework for the Ministry of Communications in implementing its policies, strategies and programmes for the period 2026-2030.
Pelan Tindakan Malaysia Digital 2030 (MD2030)	Malaysia's action plan to accelerate AI adoption across government, industry, society, supporting the nation's aspiration to become an inclusive and sustainable AI Nation by 2030.
Policy-Product-People (3Ps)	MCMC's institutional philosophy linking regulatory and strategic direction, delivery mechanisms and people-centred outcomes.
Rancangan Malaysia Ke-13 (RMK-13)	Malaysia's five-year national development plan that sets the country's strategic priorities, policies and development initiatives for the period 2026-2030.
Strategic Initiative	A key programme, policy, regulatory, institutional or partnership intervention undertaken to implement a strategy.
Strategic Thrust	A strategic priority that sets the overaching direction for ***MCMC P2630*** and guides the development of strategies and initiatives towards 2030
Universal and Meaningful Connectivity (UMC)	Connectivity that is available, affordable, reliable and secure, supported by appropriate devices and the skills required for meaningful use.
UPU Integrated Index for Postal Development (2IPD)	A composite index developed by the Universal Postal Union (UPU) that assesses countries' postal development across four dimensions: reliability, reach, relevance, and resilience. It provides a benchmark for comparing postal systems' performance and identifying areas for improvement.
World Summit on the Information Society (WSIS)	The World Summit on the Information Society (WSIS) is a two-phase United Nations summit (Geneva 2003, Tunis 2005) organised to develop a global vision aimed at building a people-centred, inclusive, and development-oriented Information Society
Extended Reality (XR)	An umbrella term for immersive technologies that combine or extend physical and digital environments, including Augmented Reality (AR), Virtual Reality (VR), and Mixed Reality (MR).

Illustrative Future Personas

Dr Shanthi
Digital Educator

About Dr Shanthi

Dr Shanthi is a lecturer living in a smart city ecosystem in Putrajaya. She teaches part-time while pursuing research on digital learning. She is passionate about borderless learning and sustainability, mentoring students on collaborative projects that unite creativity across geographies.

Aspiration

To champion borderless, inclusive and sustainable education by leveraging technology to connect minds across geographies.

Needs

Reliable high speed connectivity, trusted digital platforms, AI-assisted teaching tools, secure digital payments, and access to inclusive resources for all learners.

Urban Living 2030 "Educator Who Teaches Across Borders"

By 2030, Dr Shanthi helps learners access borderless, inclusive and future-ready education, powered by trusted connectivity, intelligent platforms and strong institutional collaboration.

A Day in Her Life in 2030

Virtual Teaching From Home

Dr Shanthi teaches from a virtual studio in her apartment, blending holographic classrooms with live participation from students in Bario, Seoul, and Helsinki, all on the same low latency stream.

AI-Powered Content Translators

AI-powered content translators on Malaysia's sovereign cloud convert her lectures into Bahasa, Tamil, Mandarin, and Korean in real time.

Smart Supply and Daily Living

Through a smart supply chain network, she receives education materials and tools via smart packaging and secure cashless payments with eKYC verification. She also collects a parcel from a smart locker on her way home.

Global Collaboration via XR

At work, she connects with colleagues from other parts of the world through XR, enabled by international connectivity and submarine cable connectivity.

Seamless Mobility and Infrastructure

While travelling between engagements, Dr Shanthi remains seamlessly connected through converged terrestrial and non-terrestrial networks, allowing uninterrupted access to teaching platforms, research resources and real-time collaboration regardless of location.

Student Collaboration and Impact

Her students collaborate on sustainable energy projects through national peering exchanges. It is not just a digital lesson, it is a living expression of MADANI's creativity that connects minds beyond geography.

Who Makes it Possible

Envisioned through whole-of-nation and public-private partnership.

- Ministry of Communications
- Ministry of Digital
- Ministry of Education
- Ministry of Higher Education
- Sector players: telcos, cloud service providers, AI and EdTech companies
- Institutions and universities

Note: The proposed list is non-exhaustive and may include other relevant stakeholders as required

What Enables Her Future

1. Sovereign AI Cloud

Secure, trusted AI infrastructure that empowers personalised and scalable learning.

2. Edge Network

High-speed, low-latency compute at the edge for immersive and real-time experiences.

3. Global Peering Grid

Robust international connectivity that unlocks seamless collaboration anywhere.

4. eKYC

Secure digital identity verification that enables safe and frictionless transactions.

5. Fit-for-Purpose EdTecH

Smart, acessible and inclusive educational technologies for every learner.

6. Wider and Resilient Connectivity

Complementary terrestrial and non-terrestrial networks can extend access and support continuity

7. AI-driven Network Analytics

Improve network stability and performance to ensure seamless connectivity.

SuriTech
Women-led Sustainable MSME Programme

About SuriTech

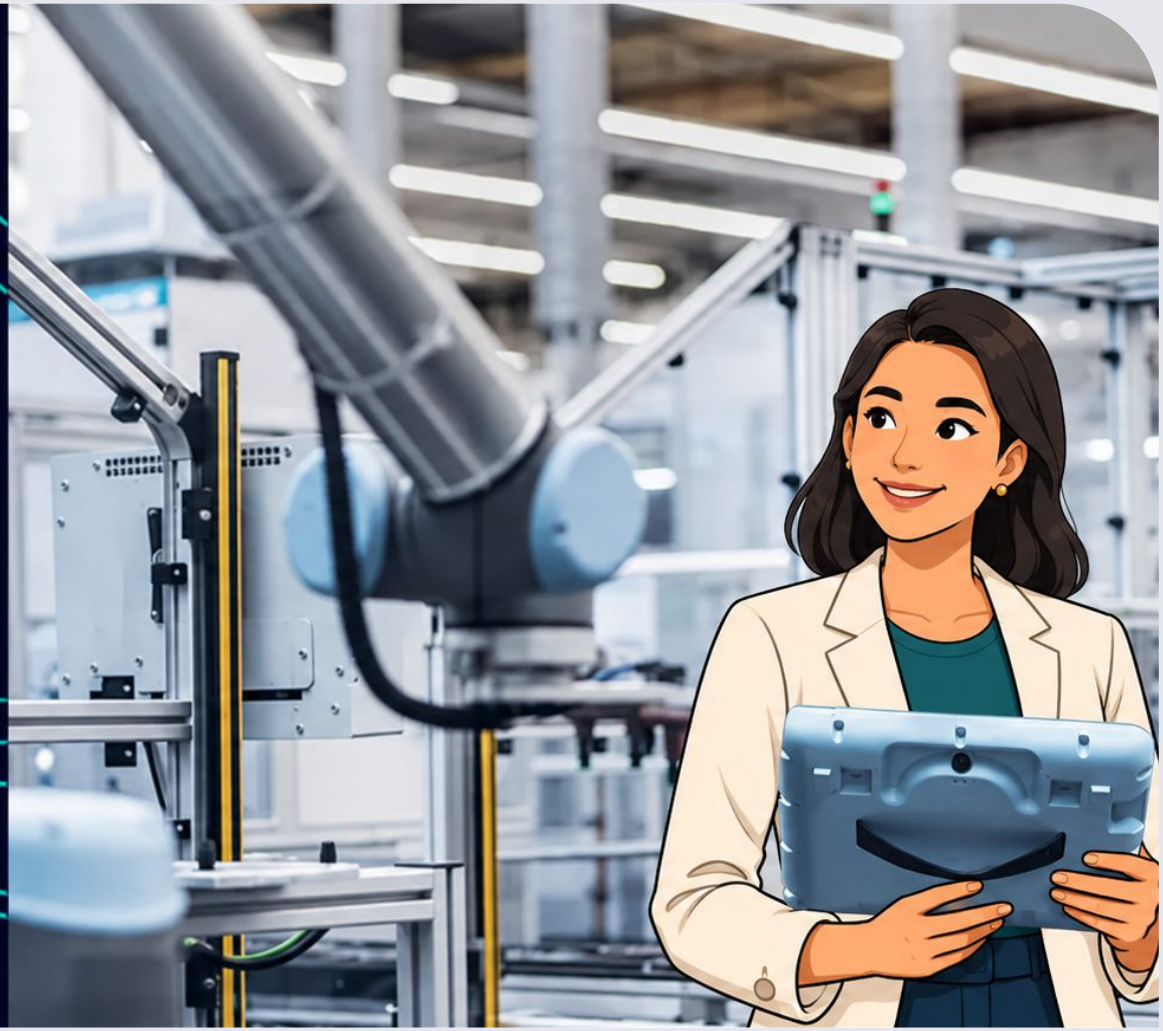

SuriTech is a women-led sustainable MSME in Bayan Lepas, Penang, producing eco-friendly packaging. It employs 15 digitally upskilled staff from B40 backgrounds and blends inclusive green innovation with digital empowerment for marginalised communities.

Aspiration

To lead sustainable packaging and smart manufacturing advancements while creating inclusive opportunities for communities to thrive in the digital economy.

Needs

Reliable high-speed connectivity, secure data exchange, AI-enabled analytics, XR training tools and collaborative R&D platforms to drive productivity, sustainability and inclusive growth.

Industry 2030 "The Factory That Thinks Sustainably"

By 2030, SuriTech shows how Malaysia's future industry can be sustainable, inclusive and digitally intelligent, powered by trusted connectivity, smart infrastructure and strong cross-sector collaboration.

Who Makes it Possible

Envisioned through whole-of-nation and public-private partnership.

- Ministry of Communications
- Ministry of Digital
- Ministry of Investment, Trade and Industry
- Ministry of Science, Technology and Innovation
- State Government
- Institutions and universities

Note: The proposed list is non-exhaustive and may include other relevant stakeholders as required

A Day in Her Life in 2030

Smart Grid and AI-Enabled Operations

The factory runs on a 5G smart grid for efficient power and uptime. SuriTech uses AI-enabled smart fulfilment and sorting, plus real-time route, demand and inventory optimisation to cut costs and support faster decision-making.

National R&D Programme

SuriTech is part of a national R&D programme advancing sustainable packaging and smart manufacturing innovations in collaboration with government agencies and industry partners.

Predictive Edge Links

Networked machines learn in real time from sister facilities in Sarawak and Nagoya, Japan through predictive edge links optimised for sustainability metrics to improve yield and reduce waste.

XR Safety and Worker Empowerment

Every worker has a digital twin trained in safety protocols via XR coaching platforms building confidence, reducing incidents, and supporting continuous skills growth.

Invisible Infrastructure

High speed industrial fibre, sovereign data exchange and quantum-secure logistics routing operate invisibly beneath the surface, ensuring resilience, trust and seamless factory-wide performance.

Industry Revolution 5.0

Through infrastructure sharing across postal and logistics networks, Industry Revolution 5.0 enables inclusion, automation and creativity to share the same factory floor.

What Enables Her Future

1. Industrial Edge Grid

High-performance edge compute and 5G smart grid for efficient, reliable operations.

2. Secure Data Exchange

Sovereign, trusted data exchange that protects IP and enables safe collaboration.

3. AR Training Cloud

Cloud-based XR coaching platforms for on-demand, immersive worker training.

4. NAS Logistics

National Address System (NAS) and intelligent logistics for seamless last-mile connectivity.

5. Resilient Connectivity

Service quality, redundancy and continuity arrangements support operations and recovery from disruption.

6. AI-driven Network Analytics

Improve network stability and performance to ensure seamless connectivity.

Dayang Clarice
Smart Local Council Officer

About Dayang

Dayang Clarice works as a Smart Local Council Officer in W.P. Labuan. She serves diverse and marginalised communities by leveraging technology to improve public services and inclusivity. She is committed to building a responsive, transparent and citizen-centric council that empowers people through digital tools.

Aspiration

To build responsive, transparent and inclusive local governance through technology-enabled public services.

Needs

Reliable connectivity, trusted digital systems, AI-enabled planning tools, accessible e-government services, community capacity-building and strong institutional collaboration.

Smart Governance in 2030 "Serving Through Digital Innovation"

By 2030, Dayang Clarice serves her community through a digitally enabled local council that leverages AI, predictive analytics and smart city technologies to deliver responsive, transparent and inclusive public services. Supported by trusted connectivity, intelligent systems and strong institutional collaboration, she helps improve quality of life while ensuring that no community is left behind.

Who Makes it Possible
Envisioned through whole-of-nation and public-private partnership.

- Ministry of Communications
- Ministry of Digital
- Ministry of Economy
- Ministry of Tourism, Arts and Culture
- State Government
- Local Government Authorities
- Sectoral players, Institutions and universities

Note: The proposed list is non-exhaustive and may include other relevant stakeholders as required

A Day in Her Life in 2030

Rooftop Hydroponic Garden

Dayang Clarice starts her day by tending to her rooftop hydroponic garden, using IoT sensors and AI-driven irrigation systems to grow fresh produce sustainably before heading to work.

AI-Powered Urban Planning

At the council office, she checks AI-powered urban planning dashboards to monitor traffic flow, waste management, and public safety across rural and urban areas.

Inclusive Outreach

She conducts outreach programmes for marginalised communities, helping single mothers and indigenous groups register for digital identity systems and access e-government services.

Job Matching and Micro-Grants

Dayang Clarice facilitates job-matching and micro-grant programmes for rural entrepreneurs through a blockchain-enabled funding platform, ensuring transparency and trust.

Community Drone Workshop

After work, she runs a community drone photography workshop at NADI MADANI, teaching people to use AI-assisted flight analytics to capture aerial views and monetise their skills.

Eco-Adventure VR Experience

Later in the evening, she takes part in an eco-adventure VR experience, virtually exploring rainforests and marine parks while contributing to sustainability campaigns through gamified challenges.

What Enables Her Future

1. AI and Predictive Analytics

Smarter insights help improve planning, service delivery and decision-making.

2. IoT and Smart City Systems

Connected systems support efficient urban management and sustainability.

3. AR/VR Engagement

Immersive technologies enable learning, participation and community engagement.

4. Drone Technology

Accessible drone capabilities open new economic and civic opportunities.

5. Wider and Resilient Connectivity

Reliable access and continuity arrangements support public services across different locations.

6. AI-driven Network Analytics

Improve network stability and performance to ensure seamless connectivity.
